Consultation feedback received on the Waitākere Ranges Local Board priorities for 2024/2025 and advocacy initiatives

Q7b What do you think of our proposed priorities in 2024/2025?

What we propose in your local board area in 2024/2025

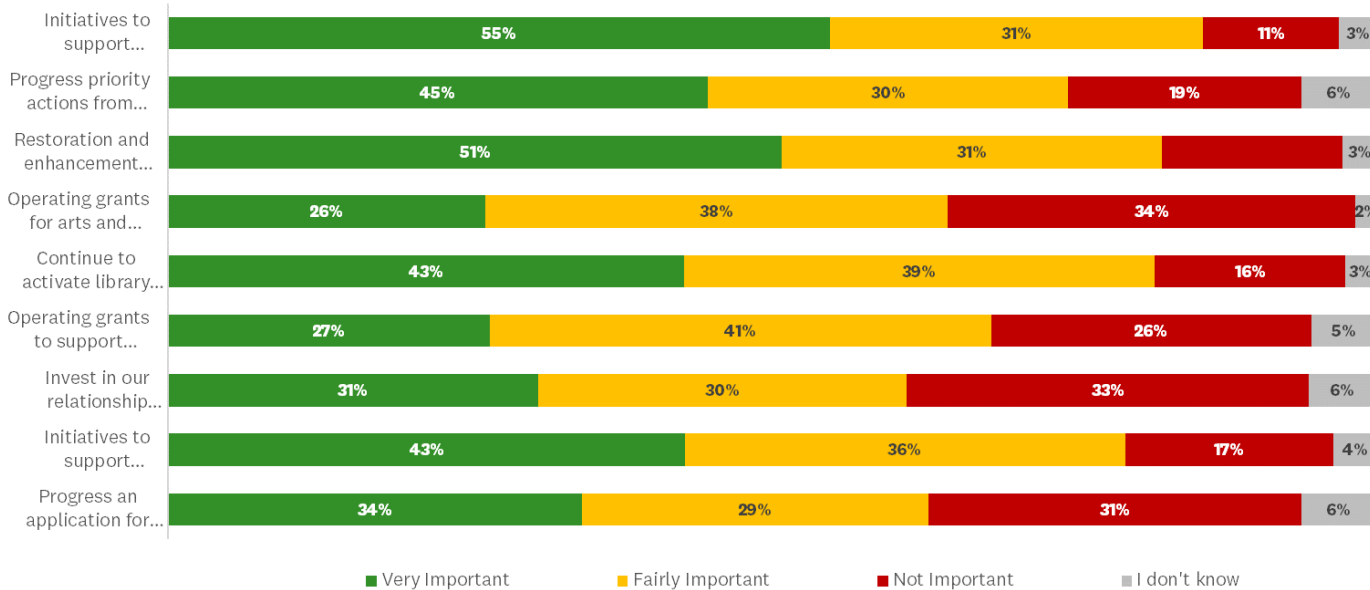

The following are the key projects and activities we plan to deliver next year, and any key changes to services:

- initiatives to support community resilience and safety
- progress priority actions from the Waitākere Ranges Local Climate Plan (currently under development)
- restoration and enhancement of significant ecological areas on local parks and in buffer zones around the regional park
- operating grants for arts and culture programmes delivered by our community arts partners, such as Te Uru
- continue to activate library spaces with programmes, services and events
- operating grants to support Glen Eden and Titirangi Community Houses
- invest in our relationship with mana whenua, Te Kawerau ā Maki
- initiatives to support youth/rangatahi
- progress an application for Waitakere Ranges Heritage Area to become a dark sky place

Local board priorities 2024-2025

Key themes across the feedback received were:

- **Priority: Initiatives to support community resilience and safety**
 - Funding for surf lifesaving facility rebuilds
- **Priority: Restoration and enhancement of significant ecological areas on local parks and in buffer zones around the regional park.**
 - Waitākere Ranges is unique and needs protecting
- **Priority: Progress an application for Waitākere Ranges Heritage Area to become a dark sky place.**
 - Some scepticism: not seen as feasible or a priority but some comments are supportive
- **Other feedback and themes**
 - Feedback from key stakeholder groups
 - Local board should fund core services

Local board priorities 2024-2034

Key themes across the feedback received were:

- **Priority: Parks and assets are well looked after**
 - Tackle weeds and reopen tracks
- **Priority: To develop a solution to the conflict between traffic and trains at the level rail crossing in Glen Eden**
 - Strong support
- **Priority: Other**
 - Number of generally supportive comments for priorities and advocacy

Plan 2024-2034**

Long-term Plan 2024-2034: regional topic

The proposed Long-term Plan 2024-2034 sets out Auckland Council's priorities and how to pay for them. Submitters were asked to respond to key questions on regional topics outlined below:

1. **Overall direction for Long-term Plan**
2. **Transport Plan**
3. **North Harbour Stadium**
4. **Major Investments:**
 - **Auckland Future Fund and Auckland International Airport Limited shares**
 - **Port of Auckland**
5. **Port Land**
6. **Changes to other rates, fees and charges**

In addition, the following proposal was included in the consultation in the Long-Term Plan:

7. **Draft Tūpuna Maunga Authority Operational Plan 2024/2025**
8. **Fairer Funding for Local Boards**

Overall direction for Long-term Plan

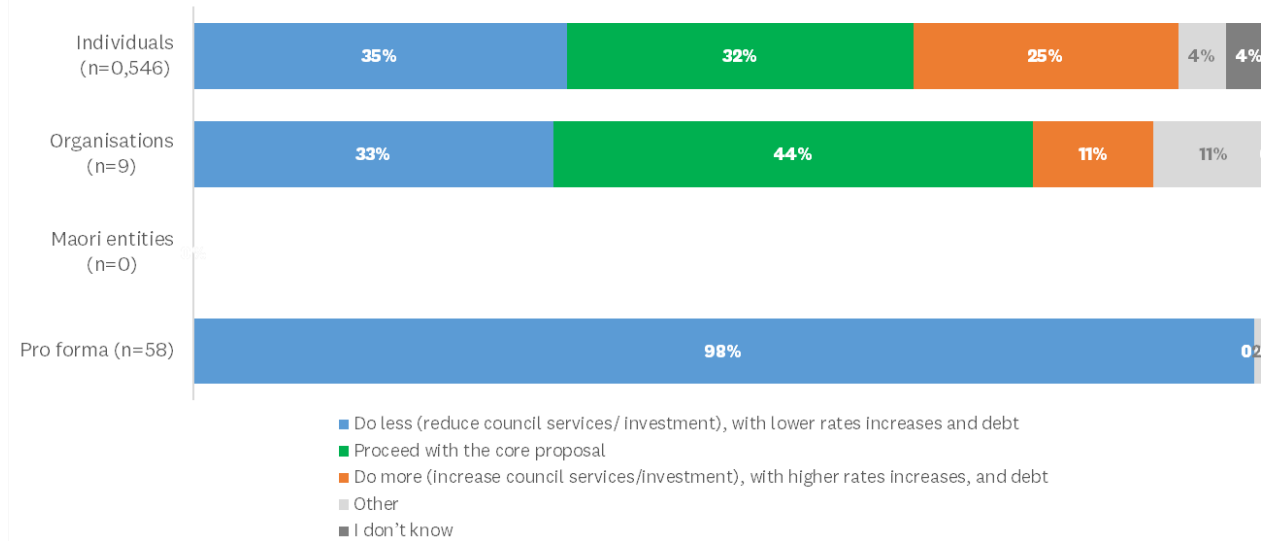

Aucklanders were asked for feedback about the overall proposed direction for council services and investment over the next ten years, the 'core proposal' alongside alternative options of 'pay more, get more' and 'pay less, get less' in seven areas of council-funded service and activities. These seven areas and their associated options are described in detail in the consultation document available at [Auckland Council Long-term Plan 2024-2034 Consultation Document](#) from pages 22-27 and included:

- **Transport** - Roads, public transport and safety improvements across the transport network
- **Water** - Managing stormwater to minimise flooding and protect waterways.
- **City and local development** - Delivering urban regeneration and lead development of the city centre
- **Environment and regulation** - Protecting and restoring the natural environment
- **Parks and community** - A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards (see section on fairer funding for local boards below)
- **Economic and cultural development** - Major events funding and economic development
- **Council support** - Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities.

The following graphs give an overview of the responses from Waitākere Ranges Local Board area.

Q2 Transport Plan

Aucklanders were asked for feedback on a proposal to work with government to make progress toward an integrated transport plan for Auckland with a proposed total capital spend of \$13.4 billion for Auckland Transport over 10 years. This will include:

- making public transport faster, more reliable and easier to use by investing in rapid transit network actions, such as making it easier to pay, including introducing capped weekly public transport passes
- network optimisation, reducing temporary traffic management requirements and introducing dynamic lanes
- stopping some initiatives previously planned such as some raised pedestrian crossings and cycleways

Q3 North Harbour Stadium

Aucklanders were asked for feedback on options for the future of North Harbour Stadium precinct. The options set out were:

1. to keep the stadium precinct as it is now, and maintain it at a cost of \$33 million over 10 years
2. redevelop the stadium precinct funded through reallocation of this \$33 million, the sale of some stadium precinct land while retaining the existing community playing fields and any other external funding available
3. change the operational management of the stadium to ensure greater use by the community (noting that this option could be considered in addition to either option 1 or 2).

Q4A Major Investments: Auckland Future Fund and Auckland International Airport Limited shares

Aucklanders were asked to provide feedback on a proposal of a diversified investment fund for Auckland (the Auckland Future Fund) in order to spread the risk of council's investments over a range of different assets in different locations.

The proposal included the transfer of council's shareholding of just over 11 per cent in Auckland International Airport Limited (AIAL) to the fund to enable the subsequent sale of any or all the shares by the fund manager.

Q4B Major Investments: Port of Auckland

Aucklanders were also asked for their feedback on options for the future of Port of Auckland. The two options identified were:

1. retain underlying ownership of the port land and wharves, and lease the operation of the port for a period of about 35 years with the upfront payment from the lease invested in the proposed Auckland Future Fund.
2. retain underlying ownership of the port land and wharves with the Port of Auckland Limited continuing to operate the port and implement their plan to deliver improved profitability and dividends.

Q5 Port Land

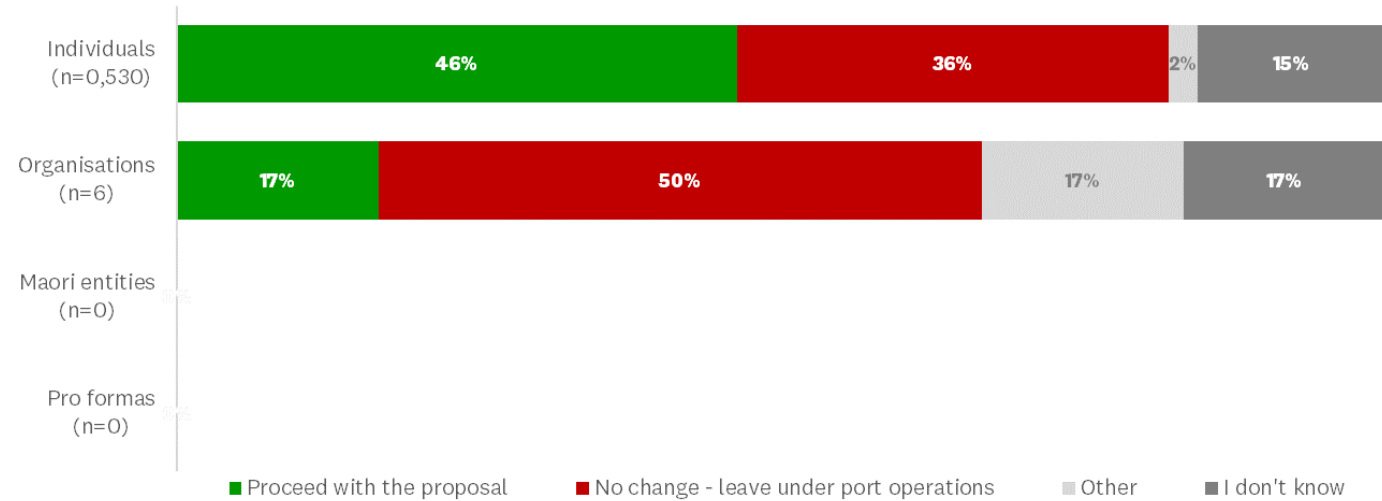

Aucklanders were asked for their feedback on a proposal whereby some land and wharves currently used for port operations could be transferred to Auckland Council and used for something else. This could include the creation of some new public spaces and/or new waterfront residential or commercial developments.

Captain Cook and Marsden wharves could be transferred to council within 2-5 years provided that resource consent can be obtained for work at the Bledisloe Terminal. These works are required to allow some port operations to be moved and would cost around \$110 million, but otherwise there would be no significant impact on the operations or value of the port.

The Bledisloe Terminal site could be freed up and transferred to council for use in another way within 15 years. However, this would significantly reduce the scale of port operations in Auckland with many shipments needing to be transported into the Auckland by truck or rail. It would also lower the value of the proposed port lease by an estimated \$300m or reduce the future profits and dividends the council earns from the port.

Q6 Changes to other rates, fees and charges

Changes to other rates, fees and charges

- Resuming the **Natural Environment Targeted Rate (NETR)** and extend it to 2034/2035 to continue to invest in the protection of native ecosystems and species.
- Resuming the full **Water Quality Targeted Rate (WQTR)** and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.
- Broadening the description of bus services funded by the **Climate Action Transport Targeted Rate (CATTR)** to reduce the need to consult each year for minor changes to the bus programme.
- Discontinue the **Long-Term Differential Strategy** which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers.
- Continue the planned roll out of **rates funded refuse collections to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026** replacing the current pay as you throw service, and consequent rates change. During the transition, the refuse targeted rate will be applied based on the approximate number of months the rates funded service is available to them.
- Adjust the **Waste Management Targeted Rates in 2024/2025** to maintain cost recovery levels and to apply the Recycling Targeted Rate to all schools.
- Increasing the **Waitākere Rural Sewerage Targeted Rate** from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026 and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates.

Changes to fees and charges

In addition to most other fees and charges which will be adjusted in line with inflation, there are also specific changes to the fees outlined below:

- baseline fees across similar venue hire and bookable spaces so that they are charged appropriately. This includes community halls, community centres, art centres and bookable library spaces
- adjusted fees for all services provided from pool and leisure centres to ensure an appropriate level of cost recovery
- an increase to film-permitting fees to adjust for cumulative inflation since 2015. It is also proposed that this fee is adjusted for inflation yearly
- increased deposit levels for a number of consenting fees.

More information on local fees and charges will be presented at the end of this session.

Fairer Funding for Local Boards

Auckland Council is proposing to shift to a fairer funding model, where some local boards will receive additional funding to deliver for their communities. Other local boards, where there is a disparity of funding, would need to make changes in their priorities to manage within a reduced budget. The proposal is to address local board funding equity through the first three years of the Long-term Plan 2024-2034.

This is proposed to be achieved through a 50/50 combination approach, i.e., reallocating some existing funding between local boards and providing some new funding (\$20 million opex and \$30 million capex) over the first three years of the LTP 2024-2034.

As the extent of funding disparity between local boards is significant, and the council's capacity for new funding is limited, only 18 local boards will get within 5 per cent of their equitable funding levels (opex and capex) by year three of the LTP 2024-2034. Of the 21 local boards, three local boards will remain funded above their equitable levels but to a lesser degree than current levels.

Topic 3: Advocacy

Local board advocacy

Consider any initiatives to include as advocacy to Governing Body as part of the Long-term Plan.

- funding for community recovery and resilience in response to last year's storms
- the Natural Environment Targeted Rate continues at its previous level (2022-2023)
- a service level be established for the Waitākere Ranges Heritage Area
- for Marae investment to support Te Kawerau ā Maki to develop a Marae and Papakainga in Te Henga
- streetscape and lighting upgrades in Glen Eden town centre
- to develop a solution to the conflict between traffic and trains at the level rail crossing in Glen Eden
- to trial a bus service to outer coastal areas
- to fund a shared path from Glen Eden to Sunnyvale
- to increase road and drain maintenance, along with climate change adaptation
- to partner to improve community safety and reduce harm
- Surf Lifesaving Northern Region.

Topic 5: Discuss Fees and charges

Waitākere Ranges Local Board Fees and Charges

2024/2025 Annual Budget

David Rose - Lead Financial Advisor

Purpose of today's session

1. To provide a recap on November 2023 workshop on proposals for fees and charges
2. To provide summary of changes on fees and charges so local board is able to:
 - provide feedback through the Long-term Plan (LTP) consultation feedback report; and
 - adopt 2024/25 Local Board Agreement and the attachment for fees and charges schedule

Recap: Fees and charges

– Three-year review cycle

Areas reviewed for budget 2024/25:

- Active communities Phase 2
- Venue hire Phase 1

Fees and charges – 2024/2025 changes

Business Area	Proposed
Venue hire (excludes Active Communities bookable spaces)	<p>Phase 1 review - this was workshopped in November last year whereby fees were adjusted to be in line with Hire Fee Framework July 2014. As a result, there were only minimal number of significant changes proposed.</p> <p>Please refer to pages 383 of the Supporting Information for Consultation Document.</p> <p>Proposing to increase 4.7% for the remaining fees to manage inflationary pressures.</p>

* The Section 17a review continues to progress in parallel to this workstream. Service delivery model recommendations are to be considered by Local Boards and Governing Body late FY24. These recommendations may have further impacts on the implementation of these fees and charges.

▶ Context: Auckland Council's long-term plan is about choices

▶ For more information on this proposal, read Part three of the consultation document

Our proposal for this 10-year plan balances providing a central level of service focussed on making do with what we have, while spending more where it is needed most.

The proposal includes spending to get Auckland moving. This investment is intended to make public transport faster, more reliable and easier to use.

It also includes strengthening Auckland's resilience to flooding events over 10 years (the Making Space for Water programme).

But there are alternatives. We could do more or do less than what's in our proposal.

We want to know whether Aucklanders think we should make do with what we have (see our central proposal below), plan to do more, or do less.

There are also options and trade-offs in how we fund the services proposed, such as creating an investment fund (Auckland Future Fund), that we want your feedback on.

Pay less and get less

▶ Paying less to get less could limit average rates increases for residential ratepayers to as low as

- 5.5 per cent in year one
- 3.5 per cent in year two
- 3.5 per cent in year three
- no more than 1 per cent above CPI inflation thereafter.

This will require cuts to some service levels, or will slow down improvements.

CAPEX
\$33.5b **OPEX**
\$69.2b

Central proposal

▶ Under our proposal the annual rates increase for the average value residential property is set at

- 7.5 per cent in year one
- 3.5 per cent in year two
- 8.0 per cent in year three
- no more than 3.5 per cent for the years after that.

This provides a central level of service focussed on making do with what we have, while spending more where it is needed most.

CAPEX
\$39.3b **OPEX**
\$72.0b

Pay more and get more

▶ Paying more to get more could see average rates increases for residential ratepayers rise by up to

- 14 per cent in year one
- 10 per cent in year two
- 10 per cent in year three
- 5 per cent for the years after that.

This includes speeding up investment in transport services and climate resilience.

CAPEX
\$52.0b **OPEX**
\$76.5b

There is a lot to consider and some challenging decisions to make – so we'd like you to have your say to inform our decisions.

➤ Overall direction for Long-term Plan

► For more information on this proposal, read pages Part four of the consultation document

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

- Do less (reduce council services/ investment)**, lower rates increases and less debt
- Proceed** with the central proposal
- Do more (increase council services/investment)**, with higher rates increases and more debt

1d. Is there anything else you would like Auckland Council **to do less of** so that you could **pay less**?

Note, for any other feedback, there is a space at the end of the form for other comments.

▶ **Transport plan**

▶ **Read pages 32-34 of the consultation document for more information on this proposal.**

Our budget proposes working with government to make progress toward an integrated transport plan for Auckland. It proposes a total capital spend of \$13.4 billion for Auckland Transport over 10 years.

This includes:

- making public transport faster, more reliable and easier to use by investing in rapid transit network actions, such as making it easier to pay and introducing capped weekly public transport passes
- network optimisation, reducing temporary traffic management requirements and introducing dynamic lanes
- stopping some previously-planned initiatives, such as some raised pedestrian crossings and cycleways.

There are also options to do more, or do less (See page 34)

2b. Is there anything you would **spend less** on?

▶ **North Harbour stadium**

▶ **Further information on each option can be found on page 104 of the consultation document.**

In response to future investment needs of North Harbour Stadium, we are considering options for the future of the stadium precinct.

We could keep the stadium precinct as it is now, and maintain it at a cost of \$33 million over 10 years. Or, we could redevelop the stadium precinct to better deliver for the needs of the North Shore community, funded through reallocation of this \$33 million, the sale of some stadium precinct land while retaining the existing community playing fields and any other external funding available.

Another option is to change the operational management of the stadium to ensure greater use by the community. Changes to operational management can be considered in addition to either Option 1 or Option 2.

3. Which options do you support for the North Harbour Stadium?

Tell us why:

➤ Major investments

► For more information on this proposal, read Part five of the consultation document

We are proposing a diversified investment fund for Auckland (the Auckland Future Fund).

The key objectives of this proposal are to:

- protect the value of the council’s major investments
- provide a funding source to mitigate the risk posed by climate change and other major environmental challenges, and change how we manage our insurance
- enhance cash returns to council to help pay for council services
- spread the risk of council’s investments over a range of different assets in different locations
- better provide for changing community needs and continuing to deliver our strategic objectives

The proposal includes the transfer of council’s shareholding of just over 11 per cent in Auckland International Airport Limited (AIAL) to the fund to enable the subsequent sale of any or all the shares by the fund manager.

The fund may be structured as a trust (or similar structure), and would have clear rules and restrictions around what circumstances the funds can be accessed by the council in the future. This might be a Council Controlled Organisation. It would be managed by a professional fund manager(s) under a clear set of investment objectives and policies set by the council.

As the objectives for the fund would involve diversifying risk by spreading the fund across a range of investments, it is almost certain that most, if not all, of the AIAL shares would be sold over time.

We are also considering changes to the way the Port of Auckland operates, which may also result in further investment into the Auckland Future Fund (see questions 4b and 4c).

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council’s shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

- Proceed with the proposal
- Don’t proceed with establishing an Auckland Future Fund and transferring AIAL shareholding
- Other I don’t know

Tell us why:

Auckland Council owns 100 per cent of Port of Auckland Limited (POAL), which is the company that owns and operates the Port of Auckland on the central city waterfront. POAL makes profits for and returns a dividend to Auckland Council. The Port land and wharves are currently owned by POAL and are used for commercial freight and cruise ship harbour facilities. We are proposing a change to our investment in the Port.

One option is for Auckland Council group to keep underlying ownership of the port land and wharves but enter into a lease for the port operations for a period of about 35 years. The lease would be subject to a number of conditions to help progress the council’s ownership objectives for the port.

This option is reflected in our central proposal and we estimate this could:

- generate an upfront payment of around \$2.1 billion, which we would then invest in the Auckland Future Fund
- lessen the rates increase for year two of the long-term plan to the proposed 3.5 per cent

Alternatively, the Port of Auckland Limited could continue to operate under the current arrangements and continue to implement their plan to deliver more profits and dividends. These planned financial returns could continue to be used to help fund council services, but as they would be lower than the cash return under the lease proposal, this would require higher rates increases or cuts to council services.

Alternatively, these financial returns from POAL (and any capital distributions from the port) could be invested into the Auckland Future Fund, noting that this would require even higher rates increases or more cuts to council services.

There is also an option to transfer Bledisloe Terminal to the council within 15 years. See question 5b.

4b. Which option do you prefer for the future of Port of Auckland?

- Retain underlying council ownership of port land and wharves, and **continue council group operation of the port** (through Port of Auckland Limited), and implement the plan to deliver improved profitability and more dividends to council
- Retain underlying council ownership of port land and wharves, and **lease the operation of the port** for a period of about 35 years and use the upfront payment from the lease to invest in the proposed Auckland Future Fund
- Other I don't know

Tell us here:

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

- Continue** to use it to fund council services **Invest** in the proposed Auckland Future Fund
- Other I don't know

Tell us here:

4d. Do you have any feedback on any other part of the proposal?

Including the proposal for self-insurance and implementation options for the Future Fund and possible changes to the council's shareholding in Port of Auckland Limited and to the ownership of the Port land.

► **For more information** see Part five of this document.

Tell us here:

▶ Port land

▶ Read Part six of the consultation document for more information on this proposal

Whether or not the operation of the Port of Auckland is leased, some land and wharves currently used for port operations could be transferred to Auckland Council and used for something else that provides public benefit. This could include the creation of some new public spaces and/or new waterfront residential or commercial developments.

Captain Cook and Marsden wharves could be transferred to council within 2-5 years provided that resource consent can be obtained for work at the Bledisloe Terminal. These works are required to allow some port operations to be moved and would cost around \$110 million, but otherwise there would be no significant impact on the operations or value of the port.

The Bledisloe Terminal site could be freed up and transferred to council for use in another way within 15 years. However, this would significantly reduce the scale of port operations in Auckland with more shipments needing to be transported into Auckland by truck or rail. It would also lower the value of the proposed port lease by an estimated \$300 million or reduce the future profits and dividends the council earns from the port. However depending on the alternative use of the site, this could provide some significant future financial benefits for the council.

5a. What option do you prefer for Captain Cook and Marsden wharves?

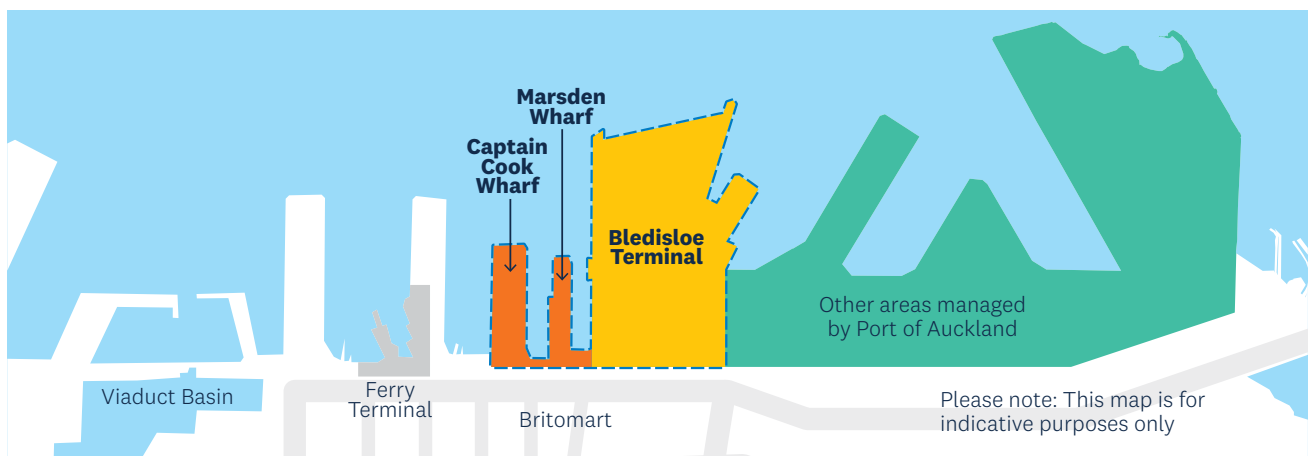

- Proceed** with the proposal to transfer Captain Cook and Marsden wharves from the port to Auckland Council so they can be used for something else that provides public benefit.
- No change** – leave Captain Cook and Marsden wharves to be managed as part of the port operations
- Other I don't know

Tell us why:

5b. What option do you prefer for Bledisloe Terminal?

- Keep** Bledisloe Terminal as a Port of Auckland **operational area**
- Transfer** Bledisloe Terminal **to council** to be used for something else, that provides public benefit, within 15 years
- Other I don't know

▶ Changes to other rates, fees and charges

▶ For more information on this proposal, read Part nine of the consultation document.

We are also proposing some changes to business rates, targeted rates, fees and charges.

6a. What do you think of these proposals?

	Support	Do not support	Other	I don't know
Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species. This increases rates for the average value residential property by around \$20.04 and \$152.71 for the average value business property.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs. This ensures that we can continue to fund the water quality improvements in harbours and streams across the region, at a lower amount for next year than previously planned. This reduces this rate from what was previously planned for the average value residential property by around \$6.53 and \$17.10 for the average value business property.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes to the bus programme (any changes to the settings of the CATTR would still require consultation).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Discontinue the Long Term Differential Strategy which gradually lowers the share of general rates paid by businesses and raises the share paid by other ratepayers. We also propose to raise the share businesses pay of the NETR, WQTR, and CATTR to align to the general rate.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Re-introduce recycling charges for schools .	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Continue the planned roll out of rates funded refuse collection to the North Shore, Waitākere and Papakura in 2024/2025, and Franklin and Rodney in 2025/2026, replacing the current pay as you throw service, and consequent rates change.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Introduce the Franklin Local Board Paths Targeted Rate of \$52 per SUIP (Separately Used or Inhabited Part) to provide increased investment in paths in the Franklin Local Board area.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Change the Rodney Drainage Districts Targeted Rate to reflect public feedback and updated analysis of the benefits to properties and boundaries.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) for the 2024/2025, 2025/2026, and 2026/2027 years to maintain cost recovery in the three-year contract cycle, and avoid an annual subsidy of around \$117,000 from general rates, with the next cost review scheduled for the 2027/2028 year.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

We are also proposing some changes to our Revenue and Financing Policy (see page 98 in consultation document) and some changes to fees and charges (page 100 in the consultation document).

4b. Which option do you prefer for the future of Port of Auckland?

Low return from PoA. Should consider moving the port eventually.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Other

This should be used to lower current debt

4d. Do you have any feedback on any other part of the proposal?

Keen to see what self-insurance entails as the devil is in the details.

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.	Do not support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.	Do not support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes	Do not support
Discontinue the Long Term Differential Strategy for business rates	Do not support
Re-introduce recycling charges for schools.	I don't know

Local board priorities

7b. What do you think of our proposed priorities for your local board area in 2024/2025?

Local board priorities	
Support community resilience	Very Important
Local climate action	Fairly Important
Restore ecological areas	Not Important
Support arts and culture	Not Important
Library services	I don't know
Support community houses	I don't know
Mana whenua relationship	Not Important
Support youth initiatives	I don't know
Waitakere Ranges dark sky project	Not Important

Tell us why:

The board needs to focus on what's important to ordinary local resident - basic stuffs related to cost of living, flood avoidance, safety.

Do you have any other comments?

Do you have any other feedback?

About time to have COOs to focus on "financial" accountability - Particularly Auckland Transport.

Organisation:

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	Do more
Water: Managing stormwater to minimise flooding and protect waterways.	
City and local development: Deliver urban regeneration and lead development of the city centre	Do less
Environment and regulation: Protecting and restoring our natural environment	Do less
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	Do less
Economic and cultural development: Major events funding and economic development	Do less
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

No you are charging us too much for what we get now. Roads are the only thing we need more of, for cars not buses or cyclists!

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Stick to your core responsibilities. Reduce council staff and expenditure on glass tower offices before coming to us for more money. You have shown to date a total disregard for us and our hard earned money wasting it on things we do not want or need. I live in the suburbs and never go into the city especially now that it is impossible to find a car park. I do not use public transport and never will or the stupid cycle ways. Stop pandering to a minority. Stop the speed bumps and raised pedestrian crossings. If you introduce congestion charges because you have approved subdivisions at the end of the motorways without investment in widening the motorways to cope with the increase in volume of cars then I would say you are useless at your job and deserve to be voted out or overthrown due to lack of confidence.

2. What do you think of the transport proposal?

Support most of the proposal

The majority of us are not interested in public transport and never will be. The sooner you get this into your thick heads the better!

2a. Is there anything you would spend more on?

Increasing roads to cope with the volume of vehicles.

2b. Is there anything you would spend less on?

Public transport

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and

transfer Auckland Council’s shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Other

4b. Which option do you prefer for the future of Port of Auckland?

Sell it and give the money back to the rate payers.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Other

To be paid back to the rate payers who own it.

4d. Do you have any feedback on any other part of the proposal?

Nothing here gives many any faith in the council at all. I thought the new mayor was going to make a difference. What a joke that was. I have zero faith in you and think we need to find a better way rather than a supercity council.

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Waitakere Rural Sewerage Targeted Rate.

Do not support an increase in this rate.

Rather support total abolishment of this rate entirely for following reasons:

1. Bring Waitakere Ranges in line with the rest of Auckland with regards to Septic Tank Pump-Outs (i.e. individual responsibility). There should be one policy for all Auckland.
 2. At present 39.6% of the Targeted Rate goes to Council costs. Only 60.4% is for the actual contractor costs (for a single pump-out every three years). The council costs imposed on each property will now be \$400 over three years. At each pump-out the individual property is also required to liaise and schedule with the contractor, thereby questions arise as to why the Council costs are so high per property simply to receive a notification letter every 3 years.
 3. All Auckland properties (including Waitakere Ranges) with septic systems are already separately responsible for required maintenance on septic tanks/systems, and the required inspections and maintenance would be much improved and easier if property owners could combine this with self-arranged pump-outs.

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	Do more
Water: Managing stormwater to minimise flooding and protect waterways.	Do less
City and local development: Deliver urban regeneration and lead development of the city centre	Do less
Environment and regulation: Protecting and restoring our natural environment	Do less

Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

People park their cars on pathways and lawns. Sometimes it takes 2-3 days to wait for the person who can fine the violator. Often when the AT worker arrives, the cars are no longer there.

There are not enough sport facilities in new suburbs

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

I pay for my house and content insurance and I don't want to pay for future floods and disasters for people who don't have one.

I don't want to pay more for old suburbs and their problems with stormwater.

2. What do you think of the transport proposal?

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Increased landscape scale predator control...repeated 1080 drops on Hunuas and introduce same to Waitakeres.

Support to fast track pest free Waiheke and Aotea.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Paying over the top salaries and allowing unnecessary high profits of organisations under council control.

Introducing so-called traffic calming measures and various income generating camera/fine systems which seem to achieve little more than raising money. Traffic congestion is appalling...so need some new approaches, therefore do less of same old same old!

2. What do you think of the transport proposal?

Support most of the proposal

See previous comments.

While I wholeheartedly support improved public transport, it won't help a sig proportion of commuters so new and ambitious ideas to avoid traffic congestion are needed.

It should be compulsory for kids to walk/cycle or bus to school

2a. Is there anything you would spend more on?

School transport solutions.

More, smaller more frequent buses...they're mostly empty!

Testing/implementing contra flow systems...eg New Lynn to Western Springs.

Road re-surfacing.

2b. Is there anything you would spend less on?

Awfully executed speed humps.

Traffic lights.

Think about what you can do for the nation, not what the nation for you. Tax payers have been paying for every cent of what the Council asks for decades, yet they face huge increases the whole time. Contractors can raise their prices, but you as the count

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Cut you so called projects because that's where corruption lies. We've seen too much money wasted. You need to review your spending and choice of contractors before asking for more rates.

Re-introduce **recycling charges for schools**.

Continue the planned roll out of **rates funded refuse collection** to replace the current pay as you throw service, and consequent rates change.

Increase the **Waitākere Rural Sewerage Targeted Rate** from \$296.75 to \$336.80 (per year) to maintain cost recovery

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

With regard to Question 1C, Council has a central proposal that recommends spending more where it is needed most. Surf Life Saving facilities are a critical component of our community. They have served as temporary welfare and community centres, as well as civil defence centres during regional emergencies, including during the Auckland Anniversary flooding and Cyclone Gabrielle.

Our facilities aren't a nice to have, they are the heart of our service. Allocated funding is essential to ensure the continued operation of our clubs and the safety of beachgoers. The amount requested is minimal when compared to the benefit it will have for the region.

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	Do more
Water: Managing stormwater to minimise flooding and protect waterways.	As proposed
City and local development: Deliver urban regeneration and lead development of the city centre	Do less
Environment and regulation: Protecting and restoring our natural environment	As proposed
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	As proposed
Economic and cultural development: Major events funding and economic development	As proposed
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Pool at Fred Taylor Park. Litter pick up and weed control on Footpaths and roads larger regional park budget for weed and pest control and track maintenance.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Fewer Local Boards. Sell North Harbour Stadium. No pool on waterfront. Mayor's personal folly.

2. What do you think of the transport proposal?

Support most of the proposal

General direction sensible but again the West is left out. Begin Lincoln Road/ Central Patk/Triangle interchange improvements as planned for last 15 years

2a. Is there anything you would spend more on?

Northwestern full bus way. SH 16 is one of the most congested routes in the morning costing millions in lost productivity and carding to emissions. Te Whau pathway funding.

2b. Is there anything you would spend less on?

Speed tables

3. Which options do you support for the North Harbour Stadium?

Other

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

4b. Which option do you prefer for the future of Port of Auckland?

It makes financial sense. The former board and CEO of ports proposed this over 6 years ago and no one was listening. This is not new but it needs to be done.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

I don't know

4d. Do you have any feedback on any other part of the proposal?

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.	Support

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

We have to get the basics right. Roothing, infrastructure, transport

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Spending ridiculous amounts on public transport, and supporting facilities in areas that don't require the service. Full size buses every 30 minutes in Waitakere township is a prime example. Those buses are empty, or with a single person on them 99% of the time, and are doing damage to the roads. A smaller, cheaper bus, run hourly would be more than sufficient.

Waitakere Rural Sewerage Targeted Rate. The average cost of a private contractor to pump out a septic tank is between \$300 and \$600 per service. The proposal at \$336.80 per year with a three-yearly pump-out equals \$1010.40 per pump-out. This price is unjustified for the service provided. Council should look for a more competitively priced contractor or allow residents to employ their own contractor to pump-out their own septic tank.

In Question 1C, Council has a central proposal indicating spending more in areas of most need. Surf Life Saving facilities are a fundamental need to help keep our communities safe. A surf clubhouse is so much more than just a clubhouse - we have used our Bethells Beach as an emergency hub when needed, the community used it for events (prior to destruction of half of the clubhouse) and our facility is the heart-beat of our vital surf lifesaving operations. To not fund something as critical as our facilities spells the demise of the thousands of lifeguard volunteer hours we provide every season and we will see a correlated increase in drownings and serious life-threatening injuries that aren't attended to by our lifeguards.

Continue the planned roll out of **rates funded refuse collection** to replace the current pay as you throw service, and consequent rates change.

Increase the **Waitākere Rural Sewerage Targeted Rate** from \$296.75 to \$336.80 (per year) to maintain cost recovery

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

With regard to Question 1C, Council has a central proposal that recommends spending more where it is needed most. Surf Life Saving facilities are a critical component of our community. They have served as temporary welfare and community centres, as well as civil defence centres during regional emergencies, including during the Auckland Anniversary flooding and Cyclone Gabrielle.

Our facilities aren't a nice to have, they are the heart of our service. Allocated funding is essential to ensure the continued operation of our clubs and the safety of beachgoers. The amount requested is minimal when compared to the benefit it will have for the region.

2. What do you think of the transport proposal?

Do not support most of the proposal

We need to be spending a lot more on reducing the need for Aucklanders to travel. With local employment, local services, local shopping, and more work from home we can reduce the need for roads, travel and transportation.

2a. Is there anything you would spend more on?

Given the problem is people travelling, we should Spend more on removing the need for this travel (i.e. work to eliminate the problem)

2b. Is there anything you would spend less on?

Spend less on accommodating the problem, .We shouldn't be spending any more on travel infrastructure that should be fundamentally unnecessary.

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

With regard to Question 1C, Council has a central proposal that recommends spending more where it is needed most. Surf Life Saving facilities are a critical component of our community. They have served as temporary welfare and community centres, as well as civil defence centres during regional emergencies, including during the Auckland Anniversary flooding and Cyclone Gabrielle.

Our facilities aren't a nice to have, they are the heart of our service. Allocated funding is essential to ensure the continued operation of our clubs and the safety of beachgoers. The amount requested is minimal when compared to the benefit it will have for the region.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Spend more in regions and less on major central Auckland and transport projects

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Of concern is what seems to be a blinkered, silo or compartmentalised council structure that lacks inter-departmental co-ordination and a concerted effort to minimise spending . The expenditure on consultancy with no infrastructure of services improvement is of huge concern to me as a ratepayer. Successive mayors and councils have let ideology dictate policy and project implementations. My personal view is that even these ratepayer feedback consultations are of no consequence as decisions have already been made and council will go ahead using ratepayers as a piggy bank. This needs to stop and any rates rise beyond 3% year must be fiercely resisted.

The amalgamation of councils , in my opinion was a travesty as all of the motivators for this amalgamation have proved incorrect and pointless. Reduction in rates was the promise. What has resulted is anti-competitive behaviour with poor /non existent fiscal and governance responsibility. Any council imposing rates of above 3% should be barred from running or standing for office.

2. What do you think of the transport proposal?

Support most of the proposal

My reticence in fully accepting Auckland Council's transport proposal for a city of 5.5 million is due to ongoing misuse of ratepayer/government funds and unchecked migration without consideration for essential infrastructure as a matter of fiscal respon

2a. Is there anything you would spend more on?

4b. Which option do you prefer for the future of Port of Auckland?

As above. Think this is fiscally prudent and responsible governance on the part of the mayor and councillors not influenced by political ideology.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Could accept both options of Continue of Invest. Any approach to reduce council debt and minimise ratepayer burden is the only approach that should be tolerated by ratepayers.

In the section on roads - do more of increasing public transport, do less of safety measures. STOP adding pedestrian crossings and raised speed tables entirely - total waste of money.

2. What do you think of the transport proposal?

Support all of the proposal

This aligns with my priorities. Make public transport more efficient and more people will use it. Try to improve traffic management to make traffic flow as optimal as possible.

2a. Is there anything you would spend more on?

Adding small buses/ vans to link people in the more remote suburbs to the nearest bus hubs e.g. out west linking Laingholm, French Bay, Wood Bay, South Titirangi, Waiatarua, Huia to Titirangi village with a more regular service. Maybe making some safe pro

Actual results. Happy to pay more if we see a result rather projects that take 5 years and are out of date before they start.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Support business's, landlords and the rich. People are hurting and struggling, not them.

2. What do you think of the transport proposal?

Support most of the proposal

getting Auckland moving easier & more efficiently is important. Removing access & development of cycle & pedestrian infrastructure is silly though. Every person walking or cycling is 1 less car and, therefore, less congestion.

I would like the Auckland Council to provide the public in details with what they've been spending the rates on for the last five years. Transport and parks are ALWAYS on the list. A before and after for the "improvements" in the last 5 years provided to the public is what is needed before these increases.

2. What do you think of the transport proposal?

Don't support any of the proposal

Transport is always on the list year after year and no one ever sees any improvement. It gets messier every year so a full report of what has improved that has benefited the public in the last five years is what I want to see first.

2a. Is there anything you would spend more on?

No. Auckland Council need to work with what they currently have and that is A LOT! I could run government with what you're getting. You misuse funds by doing dumb things all over the place that benefits no one!

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less roads, but better engineering of them (ie free turn lefts), and consequentially better public transport. The one-more-lane theory doesn't work.

2. What do you think of the transport proposal?

Do not support most of the proposal

We do not support the reduction of cycleways and pedestrian crossings. ONLY increased public transport, free and usable safe cycling/walking areas will reduce congestion.

2a. Is there anything you would spend more on?

Safer cycle and pedestrian areas for school kids. Bus or pedestrian only areas outside schools instead of car parking guaranteed by the use of concrete barriers. Reliable train network.

Less motorway building

2. What do you think of the transport proposal?

Support most of the proposal

Better cohesion in public transport is a must. But cycleways are also very important and have already improved Auckland a lot. More is needed. With housing intensification roads act as rivers and are hard for pedestrians to cross. This is a health hazard

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	As proposed
Water: Managing stormwater to minimise flooding and protect waterways.	As proposed
City and local development: Deliver urban regeneration and lead development of the city centre	Do less
Environment and regulation: Protecting and restoring our natural environment	Do less
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	Do less
Economic and cultural development: Major events funding and economic development	As proposed
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Defund or disestablish local boards completely or fund them as minimally as possible. This is an extremely high priority for me.

2. What do you think of the transport proposal?

Support most of the proposal

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

Less pedestrian and level crossings until the cost is significantly lowered

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

4b. Which option do you prefer for the future of Port of Auckland?

See above

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

The council has sufficient funding. It just needs to do better honestly. A bit of pressure should help drive that. I also think that investment returns should be earmarked for investment not operating expenses

4d. Do you have any feedback on any other part of the proposal?

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.	Support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes	I don't know
Discontinue the Long Term Differential Strategy for business rates	Do not support
Re-introduce recycling charges for schools.	Do not support
Continue the planned roll out of rates funded refuse collection to replace the current pay as you throw service, and consequent rates change.	Do not support
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) to maintain cost recovery	Support

With regard to Question 1C, Council has a central proposal that recommends spending more where it is needed most. Surf Life Saving facilities are a critical component of our community. They have served as temporary welfare and community centres, as well as civil defence centres during regional emergencies, including during the Auckland Anniversary flooding and Cyclone Gabrielle.

Our facilities aren't a nice to have, they are the heart of our service. Allocated funding is essential to ensure the continued operation of our clubs and the safety of beachgoers. The amount requested is minimal when compared to the benefit it will have for the region.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

I would like Council to concentrate on doing the basics well.

See below ...

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Transport:

We DO NOT need more speed bumps & raised intersections & we definitely don't need them painted - creating visual pollution.

We do not need more cycle lanes that are used by such a small portion of the community - especially not at the expense of traffic flow & parking.

The small difference electric buses would make can be put off - lets look at the big polluters in the country/ world.

Water:

We DO need the Council to step up and ensure they have a robust stormwater system, including scheduled maintenance - like we used to have decades ago.

We Do need Council & Watercare to include maintenance in their programme. Stop waiting for things to fail before you fix them as this just causes increased damage & costs. (It's like not putting oil in your car, for goodness sake.

City & Local Development:

Most of Auckland don't care about Auckland CBD & very rarely go there.

Haven't seen any good 'regeneration of West Auckland towns for a long time - try less signs & cones.

Let Tourism NZ promote us like the rest of NZ.

Forget about the CBD waterfront & Port redevelopment at the moment.

Environment & Regulation:

Get rid of the weeds & pests in the Waitakere Ranges! Oh, you would actually have to let

people in there to do that!

Kauri Dieback is a crock, as shown in Australia. It is naturally occurring & isn't even present in many sites where Kauri have died. Try looking at the information (finally) taken & admit that you made a mistake.

There is also no point in paying to have weeds killed in Waitakere Ranges when Watercare land is infested & seeds spread back.

Park & Communities:

We do NOT need free music, movies & get togethers paid for by rates. This is a luxury we can't afford! Central government are responsible for providing social services not local government.

And why is West Auckland always the 'poor cousin' - receiving very little?

Economic & Cultural Development:

Look at how much we are spending on consultation with Maori! Paying \$250 an hour to have a Maori open a building with a mihi is ***** ridiculous. No, I'm not racist, just a pragmatist. Most of NZ, & Maori, don't follow the 'religious type' of prayer anyway. Love the incorporation of Maori information pou & art but we need to look at getting the costs of all this under control.

Stop funding events - we can't afford them at the moment.

NZ Tourism can promote Auckland without us paying someone to move to England & receive a \$250,000 salary to do it - What the ***** were you thinking!

Council Support:

Streamline, streamline & ... streamline.

2. What do you think of the transport proposal?

Do not support most of the proposal

Get the traffic moving by removing speed bumps & raised intersections. Standardise any kept - to NOT be huge bumps.

Forget electric buses for now - does nothing in the big scheme of world climate change.

Forget cycleways everywhere - Auckland is not flat

2a. Is there anything you would spend more on?

Reopening the Waitakere Ranges - for locals, NZers & tourists.

BUT Stop upgrading every track to boardwalk standard - some people like to walk in the 'wilderness' & a track or gravel path is fine.

Get rid of the weeds & pests in the Waitakere Ranges before

2b. Is there anything you would spend less on?

See above about 'board-walking' forest tracks, judder bars, intersection painting & electric buses.

We also don't need arrow signs on every corner on Scenic Drive & Piha Road. If you can't see the corner you shouldn't be driving, or should be driving slow

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

4b. Which option do you prefer for the future of Port of Auckland?

This is essential to Auckland. DO not sell.

If the private sector can make a profit from it so can we.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Other

Maybe a mix of both, but that will depend on what savings we can make in operating the Council.

4d. Do you have any feedback on any other part of the proposal?

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

With regard to Question 1C, Council has a central proposal that recommends spending more where it is needed most. Surf Life Saving facilities are a critical component of our community. They have served as temporary welfare and community centres, as well as civil defence centres during regional emergencies, including during the Auckland Anniversary flooding and Cyclone Gabrielle.

Our facilities aren't a nice to have, they are the heart of our service. Allocated funding is essential to ensure the continued operation of our clubs and the safety of beachgoers. The amount requested is minimal when compared to the benefit it will have for the region.

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.	Support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.	Support

Continue the planned roll out of rates funded refuse collection to replace the current pay as you throw service, and consequent rates change.	Do not support
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) to maintain cost recovery	Support

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Do not agree with changing PAYT to Rates Funded Refuse Collection. With food scraps being collected there is no need anymore to put bins out every week, unless full. It may seem a good idea to include waste in the rates if you look at it in isolation. But from point of view of improving active travel this is a poor decision. If people pay for rubbish tags they may only put the bin out once a fortnight, or as our families case, once a month. This means that our bin blocks the footpath only once every 4 weeks. There is 75% less chance of the wind blowing it over in the street and the Refuse trucks can do their jobs faster which is a lesser cost to the ratepayers

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	Do more
Water: Managing stormwater to minimise flooding and protect waterways.	As proposed
City and local development: Deliver urban regeneration and lead development of the city centre	As proposed
Environment and regulation: Protecting and restoring our natural environment	Do more
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	As proposed
Economic and cultural development: Major events funding and economic development	As proposed
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

More seperated cycle lanes

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Reduce greenfield development as we cant afford to expand our infrastructure when we are catching up to maintain our current infrastructure.

2. What do you think of the transport proposal?

Do not support most of the proposal

We need more cycleways as both drivers and cyclist do not want people to cycle on the road

2a. Is there anything you would spend more on?

Seperated cycle ways

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

4b. Which option do you prefer for the future of Port of Auckland?

I do not believe leasing out the port will bring much benefit to the region

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

No, we are not a cash cow, and yes do more to make Government provide better/more funding to close the budget gap THEY have created for Auckland Council. 50% of the people living in Auckland are suffering from poverty. Go to the rich.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less budget for Arts and other fluffiness. Only budget for the core business. Reduce the councillors and local board members pay by 15%, set an example!

2. What do you think of the transport proposal?

Do not support most of the proposal

To achieve better PT you need to create DEDICATED bus lanes and get rid of on street parking on all arterial roads into the city. You seem to do half work because of a few people/businesses moaning and objecting due to losing a few on street parking place

2a. Is there anything you would spend more on?

No.

2b. Is there anything you would spend less on?

Elevated pedestrian crossings, speed bumps, cycle ways, traffic management contractors. Any elevated road object causes a 25% increase in CO2! and cancer increasing particles from diesel vehicles!

3. Which options do you support for the North Harbour Stadium?

4b. Which option do you prefer for the future of Port of Auckland?

Private companies tend to be more savvy and able to better operate ports. The lease may generate a consistent income for council.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Many projects done by Auckland Council and AT are managed absolutely not effectively and looks like money laundering! The bad quality of AC/AT staff is well-known and it's upsetting. You could manage AC properties and projects more effectively and save money if you find managers with a commercial acumen, not just willing to express their kindness.

Overall, taxpayers must be in priority as they fund all government projects. Social projects are also very important but let's limit our efforts to help, not solving all their problems by ourselves! There are so many people sitting on benefits when companies are struggling to find the staff.

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	Do more
Water: Managing stormwater to minimise flooding and protect waterways.	Do more
City and local development: Deliver urban regeneration and lead development of the city centre	Do less
Environment and regulation: Protecting and restoring our natural environment	Do more
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	Do more
Economic and cultural development: Major events funding and economic development	Do less
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Surf lifesaving clubs play a vital role in our community, providing essential services to keep our beaches safe. However, many of these facilities are reaching end-of-life and are in need of replacement. Without adequate funding, our clubs will struggle t

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less community events, they are a 'nice to have' and not necessary.

2. What do you think of the transport proposal?

Support all of the proposal

Better public transport is urgently needed in Auckland to encourage people to get out of their cars and free up the city. I would be more likely to catch the train if I knew it was reliable and was quicker. at the moment it is unreliable and slow.

2a. Is there anything you would spend more on?

Proper uninterrupted Bus lanes on the North Western.

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

I don't know

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

4b. Which option do you prefer for the future of Port of Auckland?

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund
Seems like it would deliver the best financial gains

4d. Do you have any feedback on any other part of the proposal?

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.	Support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes	Support
Discontinue the Long Term Differential Strategy for business rates	Support
Re-introduce recycling charges for schools.	Do not support
Continue the planned roll out of rates funded refuse collection to replace the current pay as you throw service, and consequent rates change.	Do not support
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) to maintain cost recovery	Do not support

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

The pay as you throw dramatically reduces the amount of rubbish our household puts into landfill (we put out our bin approximately 4-5 times per year). Should it become a general cost I will stop recycling soft plastics and be much more likely to put the bin out much more regularly and put a lot more to landfill. Across many households this will likely just make the longer term landfill management a much larger cost to Council.

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

With regard to Question 1C, Council has a central proposal that recommends spending more where it is needed most. Surf Life Saving facilities are a critical component of our community. They have served as temporary welfare and community centres, as well as civil defence centres during regional emergencies, including during the Auckland Anniversary flooding and Cyclone Gabrielle.

Our facilities aren't a nice to have, they are the heart of our service. Allocated funding is essential to ensure the continued operation of our clubs and the safety of beachgoers. The amount requested is minimal when compared to the benefit it will have for the region.

Rubbish must stay as pay as you go. Its the only way to reduce rubbish.

The only way to promote water conservation is have everyone without exemption pay a potable water charge for use. Housing Corp tenants can pay a nominal fee after their free level. It will stop useless people washing their driveways with a hose, filling up 1000 litre pools and general wastage that currently occurs at Hosing Corp residences.

More rubbish bins (or as many as there were before the council removed them all)

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less cultural and art activities... For now. These things are essential, but the infrastructure needs to be fixed.

2. What do you think of the transport proposal?

Support most of the proposal

We need a much better dedicated cycle network. No more speed bumps. Going at the speed limit still causes my suzuki swift to scratch the speedbump, and even at the proposed speed it feels horrible going over them. They're poorly built.

2a. Is there anything you would spend more on?

Cycle ways, public transport

2b. Is there anything you would spend less on?

Roads if possible, stop speed bumps entirely.

4b. Which option do you prefer for the future of Port of Auckland?

The port likely needs a restructure, but we should focus on keeping it

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Our infrastructure is falling apart, we need to fix it before we focus on anything else.

4d. Do you have any feedback on any other part of the proposal?

I'm a home owner, I'm happy with rates going up a lot. The alternative of rotting infrastructure seems significantly worse, and delaying it will probably result in a higher cost anyway down the line.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1) Surf lifesaving clubs play a vital role in our community, providing essential services to keep our beaches safe. However, many of these facilities are reaching end-of-life and are in need of replacement. Without adequate funding, our clubs will struggle.

6a. What do you think of these proposals?

Resume the **Natural Environment Targeted Rate (NETR)** and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.

Resume the **Water Quality Targeted Rate (WQTR)** and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.

Broaden the description of bus services funded by the **Climate Action Transport Targeted Rate (CATTR)** to reduce the need to consult each year for minor changes

Discontinue the **Long Term Differential Strategy** for business rates

Re-introduce **recycling charges for schools**.

Continue the planned roll out of **rates funded refuse collection** to replace the current pay as you throw service, and consequent rates change.

Increase the **Waitākere Rural Sewerage Targeted Rate** from \$296.75 to \$336.80 (per year) to maintain cost recovery

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

1) With regard to Question 1C, Council has a central proposal that recommends spending more where it is needed most. Surf Life Saving facilities are a critical component of our community. They have served as temporary welfare and community centres, as well as civil defense centres during regional emergencies, including during the Auckland Anniversary flooding and Cyclone Gabrielle.

2) Our facilities aren't a nice to have, they are the heart of our service. Allocated funding is essential to ensure the continued operation of our clubs and the safety of beachgoers. The amount requested is minimal when compared to the benefit it will have for the region.

2. What do you think of the transport proposal?

Support most of the proposal

I prefer the do more transport proposal. The extra cost on rates spread across all properties in Auckland is marginal. Aucklanders will not regret investing more in transport

2a. Is there anything you would spend more on?

Removing train level crossings on the western line so that there are separated crossings instead.
Creating a fully separated northwestern busway

2b. Is there anything you would spend less on?

No

3. Which options do you support for the North Harbour Stadium?

4b. Which option do you prefer for the future of Port of Auckland?

I prefer option 3 in the consultation document. The new management of the port is much improved than

previous management and has improved the performance of poal. Council should let this play out. Leasing can be considered at a later stage if poal perform

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Compromise position that mitigates further rates increases

4d. Do you have any feedback on any other part of the proposal?

I support the creation of a new cco for the future fund as this will ensure proper governance etc. I prefer council to maintain poal ownership and not cancel poal shares.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Better maintenance of our roads
Combine cycleways with walkways

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less raised crossings at pedestrian crossings.
Better coordination of street repairs and road dig ups
Footpaths/cycleways only on one side of the road. We don't footpaths on both sides of the road. Makes roads wider with cars parking on both sides of the road

2. What do you think of the transport proposal?

Support all of the proposal

Raised pedestrian crossings are a waste of money and can't be proved to save lives. They will only be working if pedestrians are crossing the crossing. At all other times of day and night they are superfluous.

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

Support all of the proposal

The capped weekly ticket is great. It was offered by the North Shore Bus Company before and people liked it very much.

2a. Is there anything you would spend more on?

Upgrade public transportation in the west and build more bus lines. Shorten the time to the city center during peak hours.

Highway guardrails were built on the main roads in the city, and the maximum allowed speed was restored to 60 kilometers per hour to speed up circulation.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Property taxes should be linked to average income and inflation rate.

2. What do you think of the transport proposal?

Do not support most of the proposal

More development should be done in the surrounding areas, and not all money should be put into the city center. There is no need to build a railway or light rail in the city center. There should be a clear difference between the cost of public transportat

2a. Is there anything you would spend more on?

Subsidies should be provided to low-income people who really need them. The amount of housing each household can purchase should be restricted. We should learn from countries like Singapore and South Korea, where at least each person is only allowed to ow

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	As proposed
Water: Managing stormwater to minimise flooding and protect waterways.	Do more
City and local development: Deliver urban regeneration and lead development of the city centre	Do less

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

I agree with making public transport easier, quicker, more reliable.

Otherwise I see the need for better roading while maintaining pedestrian access. I don't value raised pedestrian crossings, and I don't understand what dynamic lanes means.

2a. Is there anything you would spend more on?

Maintaining and improving public transport, increasing roading (more lanes on suburban access roads).

2b. Is there anything you would spend less on?

I disagree with reducing lanes on roads to "push" people onto public transport. Public transport needs to be a reliable, attractive option.

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

4b. Which option do you prefer for the future of Port of Auckland?

Ports of Auckland are a life line to the city, for the city. The council can run it better, and cheaper, with better outcomes than private management ever would. Keep the ports for the city, run by the city. It's our asset.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

I value ongoing council services.

4d. Do you have any feedback on any other part of the proposal?

The dark sky project has the potential to improve the Waitakere ranges as a city asset. Waitakere pays rates but receive less services than suburban Aucklanders so supporting the the community is extra important.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

I would be prepared to pay more in year 1 and 2 for a complete overhaul and simplification of Auckland council processes, top heavy management and wasteful CCOs. AT need to be reviewed to actually deliver Transport solutions for Auckland.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

The sheer amount on wasteful process and Public Relations spending, the total lack of control of CCO spending even now needs to be reduced. Auckland council is self-serving and inefficient.

2. What do you think of the transport proposal?

Don't support any of the proposal

AT have been proven to be incapable of delivering benefit for Auckland travellers apart from raising cycling from 1% to 2% of commuters. Disband or overhaul AT immediately if you want support for the transport plan

2a. Is there anything you would spend more on?

Remove 90% of traffic calming measures, speed bumps and raised pedestrian crossings. these increase pollution and CO2 emissions and could be replaced with simple paint on existing roads. Better rail and bus services with more frequency and longer hours

2b. Is there anything you would spend less on?

No more speed bumps and raised pedestrian crossings, painting intersections and reducing traffic flow. these increase pollution and CO2 emissions and could be replaced with simple paint on existing roads.

Support most of the proposal

I don't understand how 'making it easier to pay' for the public transport will create a great value for the spend. It was always easy for me to pay.

I agree with the rest

2a. Is there anything you would spend more on?

Increasing rates at the time when the OCR is so high creates an extra financial pressure for home owners, who are already hardly managing the costs. Not all home owners are rich people, who rent out their properties. Some are working 2 jobs to manage loan

Sorry but if the rates that are going to increase as proposed, I would look at moving to other towns/city. The other alternative is to move to Australia.

Auckland Council and NZ Government both use the tax payer and rate payer for solutions.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

The only thing I have seen so far is lets get Auckland Rate payers to pay for everything. Why does not the council have constructive investments where they have enough funds to do what they would like to.

Auckland Council and NZ Government both use the tax payer and rate payer for solutions.

Organisation:

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	Do more
Water: Managing stormwater to minimise flooding and protect waterways.	As proposed
City and local development: Deliver urban regeneration and lead development of the city centre	As proposed
Environment and regulation: Protecting and restoring our natural environment	Do less
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	Do more
Economic and cultural development: Major events funding and economic development	Do less
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Give a number of free visits to refuse stations (say 6 per year) which will reduce fly tipping/ illegal dumping and will support a reduction in weekly curb collections.

Charge significantly higher infringements.

Increase public rubbish bins - we have

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Defund city events. We don’t need lantern / dewalii and Pacifica events - let interested members organise, fundraise and run them privately

Cut jobs considerably.

2. What do you think of the transport proposal?

Support most of the proposal

Focus on the basics - be brilliant on roads and foot paths, then focus on fringe things like cycleways.

Be bold and innovative with solutions - look to China and Middle East for unconventional solutions!

2a. Is there anything you would spend more on?

Please do better with city rubbish, graffiti and presnetioan standards.

2b. Is there anything you would spend less on?

Events. We don’t need to market Auckland domestically ... everyone know about Auckland.

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council’s shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

4b. Which option do you prefer for the future of Port of Auckland?

You have no business operating a port - you're a council. Leave the ops to the specialists.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Needs will continue to grow and council needs a fund to deliver.

4d. Do you have any feedback on any other part of the proposal?

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.	Do not support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.	Support

I don't know

4b. Which option do you prefer for the future of Port of Auckland?

I feel like selling assets is a short term win and long term loss. \$2.1 billion actually doesn't sound like much at all considering how much we plan to invest in things like public transport. What will that buy, a couple hundred meters of track?

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

I don't know

I still don't really know what the auckland future fund is for, sorry.

4d. Do you have any feedback on any other part of the proposal?

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.	Support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.	Other
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes	Support
Discontinue the Long Term Differential Strategy for business rates	Support
Re-introduce recycling charges for schools.	I don't know
Continue the planned roll out of rates funded refuse collection to replace the current pay as you throw service, and consequent rates change.	Support
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) to maintain cost recovery	I don't know

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7b. What do you think of our proposed priorities for your local board area in 2024/2025?

Local board priorities	
Support community resilience	Very Important
Local climate action	Very Important
Restore ecological areas	Very Important
Support arts and culture	Fairly Important
Library services	Fairly Important
Support community houses	Fairly Important
Mana whenua relationship	Fairly Important
Support youth initiatives	Very Important
Waitakere Ranges dark sky project	Fairly Important

Tell us why:

Do you have any other comments?

Do you have any other feedback?

Generally speaking the plan sounds okay. Not too much spending but not too little. The priorities seem mostly right. I still think the mayor is useless so my confidence in all this going to plan isn't that high, but at least our intentions seem good.

Organisation:

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	Do less
Water: Managing stormwater to minimise flooding and protect waterways.	Do more
City and local development: Deliver urban regeneration and lead development of the city centre	Do less
Environment and regulation: Protecting and restoring our natural environment	Do less
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	Do less
Economic and cultural development: Major events funding and economic development	Do less
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Pay less salary to Wayne Brown

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Pay less salary to your high end staffs. Reduce your waste full spending. Eg road humps, traffic management company spendings, patching of poth holes. Just them once and for all and get done with it.

2. What do you think of the transport proposal?

Don't support any of the proposal

Your proposals are not going work as you have a lot of wasteful spending in your internal offices. Wayne brown does not deserve such a high salary and do other high level staffs. They are not ones that go out and carry about day to day operations.

2a. Is there anything you would spend more on?

No

2b. Is there anything you would spend less on?

Less salary for Wayne Brown and other high end staffs

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is, Change the operational management

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

4b. Which option do you prefer for the future of Port of Auckland?

We don't know whom you going give it for lease and where and how the fund will be used. If all the fund finishes before the 35 year lease then we will be left crying waiting until the lease ends before any new projects can be done.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Your current spendings are very wasteful. If you see money then you will spend it blindly and there will be nothing left for the future generations.

4d. Do you have any feedback on any other part of the proposal?

No

Drastically reduce Wayne Brown salary. He does not deserve that high salary. Get other workers in the council to work on minimum wage rate. Retire your old workers. They don't have any good ideas and perform poorly at their tasks.

no im not prepared to pay more because rates are already too high and spent with waste on initiatives that i dont support ie dual language signage etc

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less money (millions of dollars) spent on protecting Kauri trees and redevelopment of Waitekere bush tracks. Please reopen them as they are, we dont need ever present stairs in the bush, this is madness, please listen to the locals. The mother earth doesnt distinguish between the trees just needs green lungs but you allow for a destruction of green sections in West Auckland but turning them into concrete.

2. What do you think of the transport proposal?

Support most of the proposal

because we the city will come to gridlock otherwise.

i particularly support removal of the raised pedestrian crossings, cycleways as cycling can not be main means of commuting. the benefits are not proportional, cycleways are for enthusiasts only. as the

Support most of the proposal

Dynamic lanes are stupid and do not work. The money should be spent on making widening roads that require it.

2a. Is there anything you would spend more on?

Additional bus lanes that do not take over car lanes, this will assist in easing congestion on major arterial routes. If that isn't feasible, making bus stops where the bus can pull in rather than block a lane of traffic.

4b. Which option do you prefer for the future of Port of Auckland?

Private enterprise will be able to make more efficient use of the port than any local or central government department. This will benefit all of new zealand likely with increased efficiency in export and import.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and

dividends to be used?

Other

Investigate splitting the profits and dividends to cover what is essential for operations, investing the rest to the auckland future fund. Consider it auckland's kiwisaver.

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	Do less
Water: Managing stormwater to minimise flooding and protect waterways.	As proposed
City and local development: Deliver urban regeneration and lead development of the city centre	Do less
Environment and regulation: Protecting and restoring our natural environment	As proposed
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	Do less
Economic and cultural development: Major events funding and economic development	Do less
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Do less

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Do less because you can see in past 10 years no one has time to use these facilities since everyone is busy and in free time everyone wants to browse their phones to make money either bh social media or share market. So no point in wasting our money. Reduce our rates.

2. What do you think of the transport proposal?

Don't support any of the proposal

The only thing you need is to run trains all over. And get auto rickshaw with \$2 - 5 per suburb just like in India.

2a. Is there anything you would spend more on?

I cannot afford my medical insurance. I think when rates are less I can get that done for my health.

2b. Is there anything you would spend less on?

On rates

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

4b. Which option do you prefer for the future of Port of Auckland?

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

So they can reduce our rates. Also please reduce the tax. I need to get medical insurance. I'm really concerned about my health

4d. Do you have any feedback on any other part of the proposal?

Reduce rates and income tax

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Public transport that is separated from traffic (like busways and trains) with free parking at terminals. Fixing pot holes and busy intersections in new growth areas. Retreat from areas where houses are vulnerable to extreme weather problems.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Don't build sea walls to protect millionaire mansions in coastal areas. It is a losing battle that will cost a lot.

2. What do you think of the transport proposal?

Support most of the proposal

We should not stop cycleways or making pedestrian crossings safer in areas where it makes sense.

2a. Is there anything you would spend more on?

Linking different modes of transport. Cycle lanes and bus ways and trains and ferries and cars and park & rides. Make an interconnected system. Getting freight off our roads. Should be on trains and ships.

4b. Which option do you prefer for the future of Port of Auckland?

The main port should be downsized and all large freight entering the country sent elsewhere. It should retain a small port for goods coming into and out of Auckland specifically. The waterfront should become public space.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Push to remove consenting burden from local government, through insurance for builders/developers and removing ability to sue council.

Less waste in resource consent processing by better training of staff and consequences (eg inability to charge applicants) for out of scope time spent.

No subsidies for Eden Park or event promoters. Keep Council out of trying to pick winners.

So called activation events in parks which don't engage public. Seem to be of more interest to the performers and parks department.

Reduce headcount needed for compliance and direct costs to landowners by adjusting inspection cycles for modern private waste (sewage) management systems.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

It seems strange to me that Economic development is put together with Maori events. We are multi-cultural society and while I recognize that Maori are the first people, we need to be careful that support for Maori events do not become unaudited hand-outs. Economic development is paramount, as we have to earn what we need to live and develop and constantly grow.

2. What do you think of the transport proposal?

Support all of the proposal

Auckland Transport is in a sad state. We need to recapture the level of support for train journeys, fix the roads, develop roads where needed and above all introduce efficiencies. Avoid delays in projects which cost money, stick to plans as conceived, be

2a. Is there anything you would spend more on?

We need to spend more money on the rail network, as it appears to me, to make it more resilient, increase use of technology for greater efficiencies. Urban railways do not need to be run by staff, a train driver is all that is needed.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Here are my suggestions that the council rates should NOT increase at all

- Reduce the positions of executives, mid management to 50% including wages that do not fit the role e.g. \$22m for an executive when it can be used for many small projects
- Bring back the local councils, like Birkenhead council and let them manage their own area – big does not mean good, and Auckland council has not made much contribution in our area. These are the ideas of councils prior to the merge. It is all about one big council having a big ego and control, and is poor in managing money
- The increase in rates is not justifiable at all when we have to pay to get rid of rubbish. Other international councils I personally know pay less than what Auckland council charges and owners still have access to facilities that are part of the rates.
- Council plant so many trees on land that they don’t look after – the rule should be if council plants it, council needs to look after it, including grass areas in front of property

Reason: Council does not permit anyone to plant on their land yet they make owners mow their lawns. Has council ever thought of cutting the lawns of owners on land that they don’t own???

- Council needs to remove the ongoing meetings as a waste of time. Meetings should be held to a minimum with some actions of progress. Councils must be accountable. Like lots of companies, sit to waste time with no progress. Anyone would consider that as wage theft - wages as a result of owners paying Council bills

Council contracts needs to be audited and contracts needs a timeline and price.

A law should be made where contracts are set in stone. Contracts such as building of infrastructure are blown out of budget. Reason, council like anyone forming a contract are led to believe (or do not have the ability to negotiate nor have expertise) that a certain road can be built for e.g. \$10b when the actual cost is \$25b. To win the contract, Contractors under-price the work at \$10b knowing that it is \$25b so they extend the timeline of completion, using tax-payers money to fund council’s incompetence. Is that project management or is it using taxpayers money to fund a forever moving goal post of ideas and filling the Contractors pockets???

- Council needs to make laws to produce packaging that can be recycled and not go to landfill.
- Stop spraying properties with noxious grass by utilizing expensive and ineffective chemicals when alternate ideas from other countries have been successful
- Remove the diesel/petrol lawn cutting mowers with battery robotic mowers
- All projects whether it big or small should be passed through the public domain. It is after all, the public's money, not councils. Some projects are white elephants that have no incentives
- Why do Councils get consultants to charge premium amounts (in millions) to get an opinion when they should be hiring people who have that expertise.
- Council should promote use of stadium for international purposes to fund infrastructure
- Rather than focusing on 1 major infrastructure as Sir Dove Myer Robinson suggested in the 1960s - 1970s - TRANSPORT, Council has come up with plans for the past 70 years of band-aid effects, lack foresight, knowing that in any city the population would increase and so would immigration. Why spend money on cycle lanes, speed bumps and endless cameras when a good magnetic operated train or electric train suffices
- Northshore has never had a train system and the trains purchased are useless. What incentives is there for Northshore?? The old Birkenhead bus ran on its own for years and so did the Birkenhead council.

2. What do you think of the transport proposal?

Support most of the proposal

See above comments

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

- No - one wants to spend anything if you calculate how much tax payers have paid to council to run plans and ideas to the ground and focus so much wastage. And certainly, not high paid positions with high numbers of managers to waste on ineffective proje

4b. Which option do you prefer for the future of Port of Auckland?

Council needs to think about leasing to countries or companies that can economically, financially, politically and security expose the country to harm.

Leasing is not an issue but it should be reviewed on a 10 year basis - not 35 years - given the world'

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Other

Partial investment, partial council. This will allow multiple ways of financially benefitting the country but hedge on any downturn with the investments made internationally.

4d. Do you have any feedback on any other part of the proposal?

Reduce the reliance of Insurance - we need to focus on what is doable... not scare-mongering.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Projects related to traffic and public safety will be completed in order of severity. I do not want to increase property taxes significantly to complete them. Projects can be completed slowly and step by step according to the city council's economic capab

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

The allocation for election expenses should be reduced, and the number of city government staff should be streamlined to reduce government spending. Some work can be assigned to volunteers. For example, some retirees have talents but nowhere to use their spare time after retirement, and the government can use them to reduce the workload, achieve the goal of streamlining city government staff, and ultimately achieve the goal of reducing government spending.

2. What do you think of the transport proposal?

Convenient and developed transportation makes life more convenient for citizens and promotes economic development. This should be an important consideration in the city government's plan. However, it is not recommended that the city government rely on a s

Find a way to make the Port of Oakland profitable, either by reinvesting existing funds or renting out a small portion of the port. Think more about how to maximize the benefits of the port.

Invest in the proposed Auckland Future Fund

The Auckland Future Fund allows Auckland to provide assistance for urgent projects in the city.

4d. Do you have any feedback on any other part of the proposal?

The land ownership and equity of the Port of Oakland must not be lost. Just like the railway in Oakland, it is not easy to buy it back even though it has been bought back. The Port of Oakland cannot follow the same path as the railway. That is a lesson fr

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Projects that threaten the safety of citizens and improve public transportation are recommended, but it is not recommended to significantly increase residential property taxes to complete the projects. The government has property tax revenue every year, and the property tax is increased every year. The municipal government can allocate funds from existing funds to improve it. Whether the municipal government's annual fiscal revenue is reasonably allocated, whether there is a surplus every year, whether the surplus is wasted, and whether the surplus can be reinvested are among the issues that the municipal government should pay most attention to. Regarding the government's planned projects, in addition to using the existing property tax revenue, the municipal government can also consider supplementing it from other fiscal revenues.

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	Do less
Water: Managing stormwater to minimise flooding and protect waterways.	As proposed
City and local development: Deliver urban regeneration and lead development of the city centre	Do less
Environment and regulation: Protecting and restoring our natural environment	As proposed
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	Do less
Economic and cultural development: Major events funding and economic development	Do less
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Wasting money on speed bumps, traffic islands and traffic lights in areas that really do not require them.

2. What do you think of the transport proposal?

Do not support most of the proposal

Public transport has dominated the funding for many years and has proven time and time again to not be effective or reliable for anyone. Time to invest in the actual road we drive on so we are not constantly shutting off roads and motorways.

2a. Is there anything you would spend more on?

No. During this current period I would be cutting back on anything that is not required by law or required for safety.

2b. Is there anything you would spend less on?

Spend less on cycleways and public transport. They are not good value for money in the current climate.

3. Which options do you support for the North Harbour Stadium?

Change the operational management

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

I don't know

4b. Which option do you prefer for the future of Port of Auckland?

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

4d. Do you have any feedback on any other part of the proposal?

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.	Do not support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.	Do not support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes	Other
Discontinue the Long Term Differential Strategy for business rates	Other
Re-introduce recycling charges for schools.	Other
Continue the planned roll out of rates funded refuse collection to replace the current pay as you throw service, and consequent rates change.	Support
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) to maintain cost recovery	Support

Got bored throughout the survey too wordy and poorly laid out. I also then remembered that the council sends these out as a matter of obligation then does the complete opposite to public opinion/feedback they receive.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Too many council staff to be cut down, too many staff at Britomart standing there doing nothing.

The mayor to have a pay decrease, and their staff.

Sort out inflation, cost of living is too expensive

2. What do you think of the transport proposal?

Do not support most of the proposal

Creating more costs in reducing lanes, raised pedestrian cross and at traffic lights, more police to patrol the roads for non licensed dirt bikes.

2a. Is there anything you would spend more on?

Every car should be insured and mandatory to be enforced by the police if they don’t have it they get fined.

The council to get a % from all car insurances, motor bikes, bicycles, scooters and anything that has motors or electric motors.

Now there are bik

2b. Is there anything you would spend less on?

Parking infringement are too high. Parking facilities should pay council levies for all cars using this service.

Too many parking wardens as they should be less. They should use scooters instead of cars to cut costs down

About half of the proposed activity will not enhance the quality of lives proportional to the spend. Focus of core services and invest in capability and effective leadership that ensures that existing money can be spent sensibly. There are several private

2a. Is there anything you would spend more on?

New housing development planning. Right now we have lots of new builds in higher density but there is no consistency to design, and living, parking and vehicle movement criteria is poorly thought of. It's inevitable that we will end up with higher density

Should prioritize higher benefit activities above fringe activities

Do you have any other comments?

I view about two-thirds of the proposed priorities as important and the remainder as unimportant.

Do you have any other feedback?

Implementing a strong CCO Accountability policy is a good idea. The Local Board Funding Policy seems like a good idea.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

We already pay a fair price for all the services that we receive and we see huge amount of population sitting at home on benefit which are paid from the taxes we pay. Technically out of large amount of tax we are paying we only get services for a fraction

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Spend less on public transport when its not working. Building city link will not work unless we have other connecting services to reach there.

Public transport is a big failure where its unreliable and expensive. We would like to see better services for better price.

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	As proposed
Water: Managing stormwater to minimise flooding and protect waterways.	As proposed
City and local development: Deliver urban regeneration and lead development of the city centre	As proposed
Environment and regulation: Protecting and restoring our natural environment	Do more
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	Do less
Economic and cultural development: Major events funding and economic development	Do less
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

More for walking, cycling and public transport and less on roads for private commuters

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Do not support most of the proposal

I don't support anything that our new "petrol-head" Minister of Transport aspires to .. I would like to resist and mark time until common sense prevails.

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

Road and motorway expansion

3. Which options do you support for the North Harbour Stadium?

Change the operational management

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

4b. Which option do you prefer for the future of Port of Auckland?

Selling an asset (to invest in a "fund"), does not make sense to me.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services
 .. or help to hold rates but definitely no "future fund"

4d. Do you have any feedback on any other part of the proposal?

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Within the LTP document there are the listed rate percentages which likely aren't accurate based on the current rates year - average of 7% was noted but ours was 13.5% with no land/building value change so I'm dubious about the numbers. Also for Auckland

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Nice to have until the basics are fixed - basics being transportation for all modes, excellent water, green spaces (parks, play areas) especially in areas where developments without any form of outside area have been built.

Thinking of legacy projects and new stadiums at the Waterfront. These will be a financial burden to ratepayers much like the CRL annual maintenance costs v income.

2. What do you think of the transport proposal?

Support most of the proposal

A public transport system that works well for the city is a basic need and many other cities in the world manage this. It needs to work alongside good road and parking options. Many people can't use public transport for everything and this should be rem

2a. Is there anything you would spend more on?

Trimming or removing plants on traffic roundabouts - in many areas it means a driver cannot see clearly - Avondale has one as a good example where 5 roads merge to a central one. Ensure road signs are clear of overgrown trees and the like - this would be

2b. Is there anything you would spend less on?

Less of "more investment in residential speed management". We have plenty of AT's ridiculous speed management platforms that discourage going to shopping areas such as Glen Eden. They are so poorly designed that even at 5km they impact your vehicle on t

4b. Which option do you prefer for the future of Port of Auckland?

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Currently the city needs all the funds it can get to maintain/improve services. Another option could be to continue using the funds for services for say 5 years and then invest in the AFF.

4d. Do you have any feedback on any other part of the proposal?

We don't need another entity adding more staff and the cost to build on the wharves won't be realistic.

The cost of having freight offloaded in Northland and Tauranga will add costs through to the purchaser, roading network with more 50T trucks moving ac

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

I believe the general rubbish removal from kerbside should remain as a user pays service. Recycling could be made a user pays also. User pays encourages people to be recycle properly and to use other community options such as e-waste, soft plastics. User pays also works for the large number of smaller households or those who recycle, compost and use community options. I also think that as signage needs replacing it should be in english and te reo as the cost would be minimal but a project to replace all signage where it's in good condition is a nice to have. There are companies that could add te reo to existing signs that would look good and be cost effective until such time as a physical sign needed replacing.

I'd like to see the ecological activities extend to the Oratia stream walkway particularly the removal of the pest plants and vines that are throughout the region that smother natives.
I haven't heard of the dark sky proposal - what would be the benefits/

Do you have any other comments?

They're ok but I think like Council and Central Government we need to be focusing on the things that help improve our area for all people and that some things need to push out 2-3 years.

Waitakere Rural Sewerage Targeted Rates. The cost to council could be reduced by ensuring that the contractors work efficiently and don't overcharge for the service. Previously it took one operator to empty our septic tank but last time there were six people on site to do the same job. This was totally unnecessary and would have a huge cost implication.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

I think we are paying more enough to get jobs done. There is no reason to rise the rates when the gov wants to raise minimum wages.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less duplicate works in the goverment please. If everyone can be more efficiencie, there should have less waste on our tax money!

2. What do you think of the transport proposal?

Support most of the proposal

2a. Is there anything you would spend more on?

No

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

none as I already cant afford my rates. WOuld rather cut costs in other ways to save money

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Definitely anything environmental or climate related. This is what has caused us to get into so much debt.

2. What do you think of the transport proposal?

Support most of the proposal

love the idea of removing pedestrian and cycle lanes etc. Only my daughter and teenage son access public transport so a reduced cost for that per week would be helpful too.

2a. Is there anything you would spend more on?

none

2b. Is there anything you would spend less on?

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Start some manufacturing industries in this country. NZ is depending on the world for day to day needs. Absolutely rubbish.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Stop making the same roads again & again. Prime example is right now on central park drive. The road was spotless. it is being reconstructed for absolutely no reason.

2. What do you think of the transport proposal?

Don't support any of the proposal
Waste of time & waste of money. They are completely useless.

2a. Is there anything you would spend more on?

People in NZ are fighting with cost of living. Roads & infrastructure is secondary need for them right now. Use money wisely to bring interest rates down.

2b. Is there anything you would spend less on?

Absolutely. Yesterday Govt came up with interest claims for investors. Why? Do you think it will be passed to tenants? no. Just bring interest rates down.

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

The council has been spending a lot of money on planning, but the development progress has not been satisfactory. I believe that the unbudgeted costs are the reason for the projects going over budget. To address these issues, the council needs to improve

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

To alleviate the burden on taxpayers, it is crucial to engage private partners to sponsor events. Why should the council be interested in sponsoring large-scale events? The answer is simple - when profits exceed 50%, the council can sponsor such events. By partnering with private companies, we can ensure that the community benefits from events without having to bear the financial brunt.

2. What do you think of the transport proposal?

Don't support any of the proposal

The transportation system should be more reliable and convenient. Solving one problem created another, and now taxes are being raised to solve it. It is unacceptable to ask for more money to fix the problem.

1a. Which option do you prefer for the overall direction for council's Long-term Plan?
Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	As proposed
Water: Managing stormwater to minimise flooding and protect waterways.	Do more
City and local development: Deliver urban regeneration and lead development of the city centre	
Environment and regulation: Protecting and restoring our natural environment	Do more
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	Do less
Economic and cultural development: Major events funding and economic development	Do less
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?
forget spending on public transport that hardly anyone uses and fix water and sewerage issues as a priority!

2. What do you think of the transport proposal?

Don't support any of the proposal

Public transport is irrelevant when our beaches are regularly flooded with sewage. Creeks and rivers need cleaning and restoring to stop flooding.

2a. Is there anything you would spend more on?
infrastructure

2b. Is there anything you would spend less on?
parks and community

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

4b. Which option do you prefer for the future of Port of Auckland?

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and

dividends to be used?

Invest in the proposed Auckland Future Fund

Rapid rate increases would add so much extra pressure to people struggling to afford food, Drs etc at this time.

4d. Do you have any feedback on any other part of the proposal?

6a. What do you think of these proposals?

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

With regard to Question 1C, Council has a central proposal that recommends spending more where it is needed most. Surf Life Saving facilities are a critical component of our community. They have served as temporary welfare and community centres, as well as civil defence centres during regional emergencies, including during the Auckland Anniversary flooding and Cyclone Gabrielle.

Our facilities aren't a nice to have, they are the heart of our service. Allocated funding is essential to ensure the continued operation of our clubs and the safety of beachgoers. The amount requested is minimal when compared to the benefit it will have for the region.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Do not support most of the proposal

Pay less - get less. The economy is already tough enough and proposed increases for the rates plus current banking rates making it quite hard to make living. Salary is not keeping up with the rising costs.

2a. Is there anything you would spend more on?

Proper cycle lanes, the on on the Great North Road would be great.

2b. Is there anything you would spend less on?

Electric busses.

3. Which options do you support for the North Harbour Stadium?

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Dense building in outlying suburbs is causing major congestion on roads and motorways. Inner city suburbs such as grey Lynn, mt Albert, roskill, Eden could all be far more densely populated instead of these draughty old single storey villas occupying the

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

I'm unsure how money is spent in council, but as a builder caught in a renting trap with 3 kids I feel incredibly let down that citizens in New Zealand have not been empowered to own their own homes and instead property investment is nurtured and encouraged. It is causing massive social issues

2. What do you think of the transport proposal?

Support most of the proposal

Auckland public transport and cycling need more support. The amount of people sitting in single occupied cars from the suburbs to get into the city and back every day is ludicrous. Another option could be to increase the number of houses in central suburb

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Surf lifesaving clubs play a significant role in keeping our beaches safe for Aucklanders. Many of the club facilities are run down and past their use by date or have been damaged by the cyclone. Without funding these clubs will not be able to raise th

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

stop planting flowers in roundabouts and city centres. We can have natives, they are self sustaining, cheap once established. Flowers are wasteful.

No more speed bumps

2. What do you think of the transport proposal?

2a. Is there anything you would spend more on?

Public buses to Piha and other parts of the Waitkere ranges - at least on the weekends so people who don't have cars can get to Piha and our young people can move around

2b. Is there anything you would spend less on?

Speed bumps. They just grind the city to a standstill, are annoying and wasteful spending. Never seen any other city with these and can't see what they achieve except enrage people

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council’s shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

4b. Which option do you prefer for the future of Port of Auckland?

Council will loose control if leased out

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?
Continue to use it to fund council services

4d. Do you have any feedback on any other part of the proposal?

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.	Do not support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes	I don't know
Discontinue the Long Term Differential Strategy for business rates	Do not support
Re-introduce recycling charges for schools.	Do not support
Continue the planned roll out of rates funded refuse collection to replace the current pay as you throw service, and consequent rates change.	Support
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) to maintain cost recovery	Do not support

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Surf lifesaving clubs are critical to our communities. Many of the facilities are run down and need replacing. They serve their communities and the wider auckland public. They are also critical to communities in emergencies like we saw in cyclone gabrielle

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

There needs to be more investment in active transport, such as cycleways and walking. The benefits include healthier communities as they become more physical active, but also due to reductions in carbon emissions as part of climate action.

2a. Is there anything you would spend more on?

Subsidised transport costs and a move to electric vehicles.

I don't mind a fee increase. However this service to the best of my knowledge has not been delivered in Karekare for some years. This may have been affected in the last year by road damage from Cyclone Gabrielle.

I have already requested when the last pump out of my property was done, and received no reply. I am currently paying for a service that I believe I am not getting.

Housing developments without getting the developers take responsibility to improve infrastructure accordingly. Density central Auckland, make Auckland a city not an eternal suburbia.

2. What do you think of the transport proposal?

Do not support most of the proposal

Cycleways. Those are crucial to change our culture of using a car for everything. Cycleways. Build them and make this city livable.

2a. Is there anything you would spend more on?

Arts and Culture

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Restore mowing of berms, as more people are not mowing berms and thus our environment is degrading in appearance. Reconsider the rubbish bin reduction program.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Nothing.

2. What do you think of the transport proposal?

Support all of the proposal

Lateral thinking. For example, raised pedestrian crossings are creating more pollution - speeding issues should be handled by more policing. Capped pricing is a good initiative to make pt more accessible.

2a. Is there anything you would spend more on?

More frequent buses and trains. Ten minutes is the accepted time that encourages usage because users don't have to plan their trips as strictly or for "best fit"

2b. Is there anything you would spend less on?

Cycleways and blanket area speed reductions.

Auckland Council really need to cut their costs in terms of overheads. Their is lot more Auckland Council can do increase productivity of their staff and reduce the staff numbers.

2. What do you think of the transport proposal?

Don't support any of the proposal
I don't have trust in Auckland Council as

2a. Is there anything you would spend more on?

You really need to gain public confidence. Your service has completely lost the confidence. No one trust AT. At the moment you guys are forcing Aucklanders to use public transport by block traffic (with unnecessary bus lanes), removing parking, unnecessa

No - get back to core services.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Stop the 'over the top' spending. Cut jobs - those who are on \$100k plus. Look into your Contractors and their over-inflated charges. Stop paying for 9 people to watch 1 person plant flowers in 1 round-about. Stop these ridiculous cycleways - no contractor can ride with a scaffold and a drop saw on their backs - use some common sense

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?
Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	As proposed
Water: Managing stormwater to minimise flooding and protect waterways.	As proposed
City and local development: Deliver urban regeneration and lead development of the city centre	As proposed
Environment and regulation: Protecting and restoring our natural environment	Do less
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	As proposed
Economic and cultural development: Major events funding and economic development	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Stop putting so many speed bumps in!! It slows traffic and is such a waste of money. probably makes the situation more unsafe as people suddenly have to slow down. Cut down the jobs and people within the council that get paid to do not a lot. Have performance reviews and if they don't meet the targets then cut their jobs or combine them.

2. What do you think of the transport proposal?

Support most of the proposal

Can you make it faster and more reliable??

The stopping of raised pedestrian crossings sounds great!! Why in the first place?

2a. Is there anything you would spend more on?

no

2b. Is there anything you would spend less on?

no

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council’s shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

4b. Which option do you prefer for the future of Port of Auckland?

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

4d. Do you have any feedback on any other part of the proposal?

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.	Do not support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.	Support

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

I am not prepared to pay more as the council is wasteful, and will just ***** it against a wall. If I trusted the money will be well spent I’d happily pay more - but I have zero confidence that would ever happen.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Focus on core services, less fluff.

2. What do you think of the transport proposal?

Support most of the proposal
The council might get this right, maybe.

2a. Is there anything you would spend more on?

Speed cameras, red light cameras.

2b. Is there anything you would spend less on?

Spend less on salaries for the people in charge of traffic management.

3. Which options do you support for the North Harbour Stadium?

4b. Which option do you prefer for the future of Port of Auckland?

You’d have to be an idiot to get rid of a monopoly, port is key to Auckland’s resilience.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Other

Invest in making the port business better, but with better oversight...

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

not even a little bit. inflation is insane, mortgage rates are up and now you're asking if we want our rates increased? Feels very tone deaf to be honest.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

if I could solve that for you I assume I'd make a killing as a consultant,

2. What do you think of the transport proposal?

I don't know

I'm not knowledgeable enough to be that specific, but I do believe that infrastructure is important.

2a. Is there anything you would spend more on?

same as above... terrible timing on this guys. We've been hit by years of increases and so this just feels mean.

2b. Is there anything you would spend less on?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

AT has become an ideological organisation (see detailed feedback below) and should have its funding cut substantially.

All economic development spending should be cut. Industries such as tourism and events should fund their own promotional activities.

Those of us who already compost at home should be able to opt out of the food scraps bin targeted rate.

2. What do you think of the transport proposal?

Do not support most of the proposal

AT has become an ideological organisation. Rather than delivering services, there appears to be a focus on political interventions such as bilingual bus announcements, speed limit reductions that go far beyond what is necessary for safety, extremely expen

2a. Is there anything you would spend more on?

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

I am VERY MUCH against increasing the Waitakere Rural Sewage Costs - this increase means that you are charging \$1010.40 for a service that actually costs \$747.50. If the council require \$262.90 (or roughly 30%) subsidy, or in comparative terms need to pay someone for 8 hours to do something that takes me 5 minutes to organise - then there is something VERY wrong with how you are running the system. Not to mention you should be getting a better rate than I can get, so you are actually in all likelihood MAKING a lot more than 30%. I am happy to have this amount taken off my rates and I will organise having the tank emptied myself, as I am sure are a lot of others in the area.

This is becoming a road to finical destruction forcing home owners to downsize and sell their properties often moving offshore.

Many workers in Local Government/NZ Government are renters only who gladly vote for excessive yearly property rate increases.

They vote and support too many overloaded new and old services.

Auckland Council needs to sell and off load all recreational parks except costal and Regional Range Reserves..

Sell off all Museums,Art Galleries,Golf Courses,Swimming Pools,Libraries,Halls,Stadiums,Flower Gardens and all the other bagged liabilityys.

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Other

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	Do more
Water: Managing stormwater to minimise flooding and protect waterways.	Do less
City and local development: Deliver urban regeneration and lead development of the city centre	Do less
Environment and regulation: Protecting and restoring our natural environment	Do less
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	Do less
Economic and cultural development: Major events funding and economic development	Do less
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Solving road congestion is Auckland's top priority.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

We cannot do less of the services that most people use or benefit from. Everything should be measured by the total number of people benefiting.

2. What do you think of the transport proposal?

I don't know

There are many projects that are not so urgent, but they consume resources, money and time. For example, raising crosswalks, etc.

2a. Is there anything you would spend more on?

2b. Is there anything you would spend less on?

Road maintenance should be more efficient, open to bidding, and less lazy.

3. Which options do you support for the North Harbour Stadium?

I don't know

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

I don't know

4b. Which option do you prefer for the future of Port of Auckland?

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and

dividends to be used?

Continue to use it to fund council services

Funds are established to make money, not to absorb more money

4d. Do you have any feedback on any other part of the proposal?

Auckland has many problems that need continuous funding to support and change. If the airport and port can consider injecting funds, why not issue a gambling license to the foundation to attract investment and build another casino and related facilities.

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.	Support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes	Do not support
Discontinue the Long Term Differential Strategy for business rates	Support
Re-introduce recycling charges for schools.	Support
Continue the planned roll out of rates funded refuse collection to replace the current pay as you throw service, and consequent rates change.	Support
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) to maintain cost recovery	Support

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Fix rural roads and restore sensible speed limits, eg reduced speed limits on rural roads is ridiculous !!

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less speed bumps, less woke *****, back to basics, roads, rubbish, water and waste

2. What do you think of the transport proposal?

Support most of the proposal

You need to sort public transport in the West of Auckland. The watered down bud way is *****.

No/limited public transport beyond Westgate and 10,000’s of new houses on the other side of a single lane in/out _ you guys are idiots allowing this before

2a. Is there anything you would spend more on?

Rural roads, seal current gravel roads.

2b. Is there anything you would spend less on?

Stop cycle lanes, stop speed bumps/lights etc.

3. Which options do you support for the North Harbour Stadium?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Get. Rid of those stupid mini food scrap bins. Get rid of half the people in Auckland Transport. They keep doing dumb stuff no matter how much people complain. I am suck of road works, road cones and doing up perfectly good footpaths and not doing up terrible ones.

2. What do you think of the transport proposal?

Don't support any of the proposal

Auckland Transport are not the right people to do this work. We need to stop purting in those pedestrian crossings and shutting down access to businesses by turining some streets into pedestrian only

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	Do less
Water: Managing stormwater to minimise flooding and protect waterways.	As proposed
City and local development: Deliver urban regeneration and lead development of the city centre	Do less
Environment and regulation: Protecting and restoring our natural environment	Do less
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	As proposed
Economic and cultural development: Major events funding and economic development	Do less
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Create a functional high speed high frequency train service between Hamilton and Helensville (and beyond perhaps) negating the need for all of the other nonsense you have proposed yanking more rates money for. This city is a joke with its obsession with r

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Roading, housing developments, pest control. You’re driving birds and lizards from our city by pesticing everything, you’re driving native owls from our reserves by poisoning rats and mice and constant development noise, then you blame cats. This city/country is absolutely insane and has no understanding of how ecosystems adapt. I lived in the bush for a decade. Everything you are doing is backward and heavy handed, badly thought out. Killing non native trees that foster native trees growth. It’s absolutely sickening. Your approach needs to be much more selective and targeted. You should be using coconut oil or hot water on weeds. Glyphosate is disgusting. Who will you blame when you’ve killed all the pests and “predators” and the wildlife still doesn’t come back. Everything you do is based on money not out of care for this city. You’ve taken bins out of reserves now I watch trash flowing into our waterways. It disgusts me what is becoming of tamaki makaurau

2. What do you think of the transport proposal?

Don’t support any of the proposal

See previous comments, it’s a joke. Implement a good rail service, solve all the problems with one simple solution.

2a. Is there anything you would spend more on?

A functional train system from Hamilton to Helensville

2b. Is there anything you would spend less on?

Endless roading upgrades. The new National Ticketing System.

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is, Change the operational management, Other

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council’s shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?
 Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

4b. Which option do you prefer for the future of Port of Auckland?
 Move the port up north and build swanky housing, restaurants, parks etc on the land, it shouldn't be there.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?
 Continue to use it to fund council services
 Otherwise you're just going to claw back the money from rates

4d. Do you have any feedback on any other part of the proposal?
 Auckland should never have had a port there.

With such high interest rates and such traffic jams, it is better to rent a house. Selling a house will lose money. People have no money left to be exploited.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Approve fewer high-density residential buildings. New Zealand is no longer the New Zealand it once was. It is getting worse every year.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

less cultural activities...we should not be supporting activities that are for some of the community. I am not anti gay but the ratepayers should not be expected to pay for parades etc which do not involve us all. The same for cultural activities. Also an in depth review is need for the amount of subsidy paid for transport paid to the bus companies. I believe there is overspending here when not needed...a lot of wastage...large buses running empty (why not use mini buses at these times?) and many more issues

2. What do you think of the transport proposal?

Support most of the proposal

I am very much in favour of stopping most of the speed bumps that not only have an exorbitant cost but create many problems as well. Problems for emergency vehicles, slow down traffic too much causing traffic congestion and not good for our vehicles etc

2a. Is there anything you would spend more on?

I think the council should be spending less on everything and sticking to the essential necessities that affect the ratepayer

2b. Is there anything you would spend less on?

speed bumps, a lot of money is wasted when it comes to repairing our roads with cones everywhere for example. I beleive the council needs a good clean out of inactive staff and major cuts with staff. I have known council to pay staff redundancy and then r

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

4b. Which option do you prefer for the future of Port of Auckland?

I have never believed in selling the silver for a short term fix. Assets generally improve over time and the option of selling any or part of them will in the longer term cost the ratepayer. Look at the saga of selling NZ rail. You have only to look over

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

These funds belong to the poor long suffering ratepayer and should be used to help us rather than prop up another ridiculous scheme

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Rubbish collection - pay as you go users are also paying a fee in their rates which has gone up considerably over the years.

I also think that it is time churches and charities should be paying rates as most of these are run as profit making businesses (The operations have changed over time). Also maori land should be paying rates - I know of people that don't have to pay rates because it is maori land - but they get the same services as non maori land owners. This does not seem fair and not a part of the treaty

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

No we need to trim costs. I live semi rural West Auckland and I see very little changes/modifications in our area so why should I pay more rates.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

All these raised pedestrian crossing are an absolute pain on roads.

Public transport I do not catch, we have the train nearby and I have caught it twice over 12 months

2a. Is there anything you would spend more on?

No

2b. Is there anything you would spend less on?

Public transport majority use their own cars

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

4d. Do you have any feedback on any other part of the proposal?

6a. What do you think of these proposals?

Resume the **Natural Environment Targeted Rate (NETR)** and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.

Resume the **Water Quality Targeted Rate (WQTR)** and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.

Broaden the description of bus services funded by the **Climate Action Transport Targeted Rate (CATTR)** to reduce the need to consult each year for minor changes

Discontinue the **Long Term Differential Strategy** for business rates

Re-introduce **recycling charges for schools**.

Continue the planned roll out of **rates funded refuse collection** to replace the current pay as you throw service, and consequent rates change.

Increase the **Waitākere Rural Sewerage Targeted Rate** from \$296.75 to \$336.80 (per year) to maintain cost recovery

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do more (increase council services/ investment), with higher rates increases and more debt

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	Do more
Water: Managing stormwater to minimise flooding and protect waterways.	Do more
City and local development: Deliver urban regeneration and lead development of the city centre	Do more
Environment and regulation: Protecting and restoring our natural environment	Do more
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	Do more
Economic and cultural development: Major events funding and economic development	Do more
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

More cycling infrastructure, it's a wonder anyone cycles at all with no proper network. 300km or so of cycle stuff and only 100km of it is safe, meanwhile you have 7000km of local roads plus state highway. Sped far more on cycling please. PT could use som

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less new roads, we already have 7000km of them. Also they don't need to be maintained to a pristine standard, do side roads really need 24/7 two-way access? We could save a lot of opex repairing them constantly by converting them to one way.

2. What do you think of the transport proposal?

Do not support most of the proposal

What has rapid transit got to do with capped fares? These are entirely different things. Who wrote this form? I support investment in rapid transit and I support capped fares.

Network optimisation seems okay, but what's the issue with traffic management?

2a. Is there anything you would spend more on?

Walking, Cycling, Public transport. West Auckland could also use some more love, it seems there is far more investment through the rest of Auckland. My suburb's streetscape hasn't changed since 2008 looking at Streetview.

2b. Is there anything you would spend less on?

Less new roading, less road maintenance, assess roads if they need to be as wide as they are, also assess if they need to be two-way, reduce on-street parking as well, these are all wastes of opex money maintaining completely needless surfacing.

Stop sea

ALL are Core Council business. Treescape charges need to be fine tooth combed. They are over-charging due to over-staffing from what I have seen. Works need to be let contracts that are publicly available to quote against. All roading work needs costing, and contracts let to BEST outcome. Automatically operating at any cost is not good business. Stop saying doing the same is going to cost extortionately more to ratepayers. This is unacceptable non business attitude and practice. The figures being pulled out of Auckland Council's hat need serious analysis. All rubbish collection should be Pay as You Throw. Then residential can have as many bins and sizes they want. A barcoded bin would remove operational costs. This would reduce rubbish collection. Signs and Cameras need to be installed on dumping roads and extreme fines actioned and publicly notified.

Road building, we cannot road-build our way to a more robust, climate-resilient city. Huge expensive roads only lead to induced demand and more lanes, more construction needed to keep traffic flowing.

2. What do you think of the transport proposal?

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Ratepayers shouldn't be asked for more for anything. The rates should be set plus a small percentage for inflation. Capital projects should be funded differently through investments not put back to the ratepayer.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Stop wasting money on projects we realistically can't afford eg second harbour bridge and city Light Rail

1a. Which option do you prefer for the overall direction for council’s Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	Do more
Water: Managing stormwater to minimise flooding and protect waterways.	As proposed
City and local development: Deliver urban regeneration and lead development of the city centre	Do less
Environment and regulation: Protecting and restoring our natural environment	Do less
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	As proposed
Economic and cultural development: Major events funding and economic development	Do less
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	Do less

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

No, We do not want to pay more, in the past few years Auckland Council did a very bad plan and work.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Yes, it is enough for resident being charged excessively for many useless things. 1. reduce the councilors wages

2. manage the council staffs to work effectively and efficiently, do not employ too many staffs but doing nothing.

2. What do you think of the transport proposal?

Do not support most of the proposal

Current public transport is too expensive and not reliable. Regional fuel tax is supposed to be used to subsidy the transport cost therefore resident will be more comfortable to ride public transport than private car.

2a. Is there anything you would spend more on?

No, we have more than enough to have the rates increased, fuel tax increased, RUC charges, parking increased, public transport cost increased.

2b. Is there anything you would spend less on?

Yes, spend less on councilors wages.

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is, Change the operational management

4b. Which option do you prefer for the future of Port of Auckland?

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Port is a gate for business activities, export and import as part of the heart of business that required a good services. Port should not be controlled by private companies that are focused on profit making. The profit invested to Auckland Future Fund can

4d. Do you have any feedback on any other part of the proposal?

It is the time for Auckland required a better and reliable metro systems. By having a good metro networking and affordable fee for public this will encourage people to use public transportation more and it will automatically reduce the use of private vehi

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Make sure all new developments have more off street parking as all this infill housing is causing traffic chaos and reducing road safety in the suburbs due to too much on street parking reducing visibility.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Stop wasting money on pointless raised crossings, etc. as they don't slow drivers down and cost too much.

2. What do you think of the transport proposal?

Support most of the proposal

Concentrate on public transport as this will improve things. Continue making the road system so unusable so people either have to work from home or use public transport as you can no longer move in a car.

2a. Is there anything you would spend more on?

Public transport

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Increase costs for corporate/business customers, not residents. Reduce funding for international events and touring, such as sports, concerts etc.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Decrease or stop funding support for one-off events, such as concerts, tours, sporting event. If an event cannot proceed by being subsidised, then it should not exist. Calendar events, such as Pasifika should continue, whilst a proposed concert or sporting event should not receive any ratepayer funding. If it cannot pay it's on way, then it should not exist.

2. What do you think of the transport proposal?

Do not support most of the proposal

Proposal is still biased to road transport solutions supporting private/business owned vehicles (excluding buses). Focus should be on ensuring mass-transit options are not defunded or delayed, e.g. trains, buses.

2a. Is there anything you would spend more on?

Continue to grow options that increase participation in mass-transit, walking and cycling. Investigate how to move commercial vehicle traffic to off-peak use, such as mandating heavy truck delivery between 10pm and 4am

2b. Is there anything you would spend less on?

Anything the promotes or advances private vehicle use

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

New capital brings more demand on maintenance and renewals. Some new capital for capacity is not really needed. People will adjust their expectations to what is available.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

Concern about reduction in public transport services or delays to network upgrades.

2a. Is there anything you would spend more on?

Removal of rail crossings and track maintenance.

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

4b. Which option do you prefer for the future of Port of Auckland?

More certainty on services being provided.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

I wouldn't want to see a reduction in services

4d. Do you have any feedback on any other part of the proposal?

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.	Support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes	Support
Discontinue the Long Term Differential Strategy for business rates	Support
Re-introduce recycling charges for schools.	I don't know
Continue the planned roll out of rates funded refuse collection to replace the current pay as you throw service, and consequent rates change.	Support
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) to maintain cost recovery	Support

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

Local board priorities

7b. What do you think of our proposed priorities for your local board area in 2024/2025?

Local board priorities	
Support community resilience	Fairly Important
Local climate action	Fairly Important
Restore ecological areas	Fairly Important
Support arts and culture	I don't know
Library services	Very Important
Support community houses	I don't know
Mana whenua relationship	Fairly Important
Support youth initiatives	Very Important
Waitakere Ranges dark sky project	Not Important

Tell us why:

Do you have any other comments?

I would like to see governing body support for additional initiatives, in particular, dealing with the level rail crossing in Glen Eden, increase in road and drain maintenance and streetscape upgrades in the Glen Eden town centre.

Do you have any other feedback?

Strongly support the fairer funding model

Increasing costs for building infrastructure in new areas, and focus on provision of high efficiency, lower per use cost services in high density areas including public transport.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Stop issuing building consents in flood areas or in new areas when high infrastructure implementation costs are required.

2. What do you think of the transport proposal?

Support most of the proposal

Single or dual person motor vehicle should be disincentivised in favour of public transport.

2a. Is there anything you would spend more on?

mass rapid public transport, congestion charge establishment, low passenger efficiency motor vehicle charge establishment

2b. Is there anything you would spend less on?

Support most of the proposal

Focus should be on public transport and active transport. Cars have had it too good for too long. With the CRL now only years away, everything should be done to ensure that it works optimally with other parts of the public transport system working together

2a. Is there anything you would spend more on?

Public transport and cycleways

2b. Is there anything you would spend less on?

Network optimisation - if you drive a car, then expect bad traffic.

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

4b. Which option do you prefer for the future of Port of Auckland?

The ports are under performing and take attention away from real issues get someone into lease them and improve the rail to get trucks of the roads.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

4d. Do you have any feedback on any other part of the proposal?

Self Insurance should only be to a level i.e. 50% of anything over 20 million

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.	I don't know
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.	Support

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	Do more
Water: Managing stormwater to minimise flooding and protect waterways.	Do more
City and local development: Deliver urban regeneration and lead development of the city centre	Do less
Environment and regulation: Protecting and restoring our natural environment	Do more
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	Do more
Economic and cultural development: Major events funding and economic development	As proposed
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Fix our footpaths and roads in west Auckland damaged by the floods. Put in stormwater infrastructure to minimise impacts of flooding events.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Replacing footpaths/roads that do not need to be replaced. Maintenance funding needs to be re-prioritised to take into account rebuilding roads and footpaths damaged by the floods.

2. What do you think of the transport proposal?

Support most of the proposal

I think cycleways should still form part of the funding as they take people out of their cars reducing congestion and improving health outcomes.

2a. Is there anything you would spend more on?

Better footpaths in west Auckland so kids can safely walk to school. Better lighting in areas for CPTED.

2b. Is there anything you would spend less on?

Overspending on the CBD - e.g. charging points for devices (luxury we can't afford when there is so much to do in west Auckland re flood repairs)

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

4b. Which option do you prefer for the future of Port of Auckland?

Council should retain ownership, but it makes sense to use a lease system to generate a return on the investment.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

There is a huge need to fund Auckland's aging infrastructure water/wastewater, stormwater and transport network. The sink holes that are becoming more frequent show that the network isn't being maintained adequately. This put our environment at huge risk

4d. Do you have any feedback on any other part of the proposal?

Key priorities should include prioritising funding for flood repair work. Many roads are still one lane and footpaths are in a poor state of disrepair.

Do you have any other comments?

Should include focus to repair flood damage (see comment above).

Do you have any other feedback?

Local board needs to be more active working across agencies to ensure flood repairs are done when other infrastructure projects are being undertaken. Watercare replaced the Huia pipeline on roads damaged by floods and closed roads for construction. Water

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Clearing plants and plant debris from drains in West Auckland. There is no street clearing and there are pest plant species, such as wild ginger, growing in the drains and this is causing very slow drainage. Even a normal amount of rain causes large puddl

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Road improvements in West Auckland - this is not a priority when we have bigger problems such as flood damage and risk. Not only are we drowning in water but in orange cones too!

2. What do you think of the transport proposal?

Support most of the proposal

Improving public transport is imperative to reaching climate initiatives and increasing quality of life for citizens. Building more lanes and less cycleways is not how we achieve this.

2a. Is there anything you would spend more on?

The light rail!!

2b. Is there anything you would spend less on?

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

- With regard to Question 1c, Auckland Council has a central proposal that recommends spending more where it is needed most. Surf Life Saving facilities are a critical component of our community. They have served as temporary welfare and community centres, as well as civil defence centres during regional emergencies, including during the Auckland Anniversary flooding and Cyclone Gabrielle. Mairangi Bay Surf Lifesaving Club volunteers rescued over 70 people in the Auckland Anniversary floods and did so operating out of storage shipping containers.
 - Our facilities aren't a nice to have, they are the heart of our service. Allocated funding is essential to ensure the continued operation of our clubs and the safety of beachgoers. The amount requested is minimal when compared to the benefit it will have for the region.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Do not support most of the proposal

On average, cycleways deliver \$0.26 back per dollar spent, and cars cost \$0.82 per dollar. We need to invest in a more dynamic cycle network around Auckland. We do not need to change existing temporary traffic management solutions to ad dynamic lanes.

2a. Is there anything you would spend more on?

Spend more on Cycleways and improving the cycle network

2b. Is there anything you would spend less on?

3. Which options do you support for the North Harbour Stadium?

4b. Which option do you prefer for the future of Port of Auckland?

I oppose any sale or lease of the POAL, and am not convinced of the financial benefit of Auckland Future Fund.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and

dividends to be used?

Continue to use it to fund council services

I am not convinced of the financial benefit of Auckland Future Fund.

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

The NETR is probably one of the most successful programmes of work council is undertaking, in the most important area of protecting and enhancing the natural environment and taking positive climate action. It should be retained at the very least, if not enhanced, in recognition of the importance of our natural environment

Rates funded refuse collection penalises smaller households and those already minimising their waste to landfill to subsidise larger households and those not actively minimising waste. It is likely to lead to perverse outcomes where MORE waste may end up in kerbside collections as people feel disincentivised

Pay as you throw is the fairest system

Raising the Waitakere Rural Sewage targeted rate is a blatant moneymaking scheme as the charges to pump out septic tanks are known to be less than the current rate as it is, let alone after the proposed increase - despite assuming council should be able to secure a very competitive rate. Households should be able to arrange their own tank pump outs (and save considerable money)- as they do elsewhere in Auckland. Non-compliance could be easily monitored by requesting households to provide proof of a pump out and/or access to contractor's records.

Transport: Roads, public transport and safety improvements across the transport network	As proposed
Water: Managing stormwater to minimise flooding and protect waterways.	As proposed
City and local development: Deliver urban regeneration and lead development of the city centre	Do less
Environment and regulation: Protecting and restoring our natural environment	As proposed
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	Do more
Economic and cultural development: Major events funding and economic development	As proposed
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	As proposed

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

Fund Community organisations to support local programmes and initiatives

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Less nonsensical expenditure (such as the plinth under Henry Atkinson's state!)

But I have expectation that anyone at Council has any interest in listening to (or taking any notice of) the views of Auckland residents.

2. What do you think of the transport proposal?

Support most of the proposal

I doubt that proper planning will be undertaken to actually need the needs of current and potential users.

2a. Is there anything you would spend more on?

Small buses in local streets to connect to feeder routes to larger hubs. Small buses could be electric (less pollution), lighter (less wear/damage to roads) and much easier to navigate narrow streets.

2b. Is there anything you would spend less on?

Raised pedestrian crossings (except those adjacent to schools) and especially those combined with traffic lights controlling the crossing (i.e. not at an intersection). Definitely that's daft!

3. Which options do you support for the North Harbour Stadium?

Change the operational management

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Other

4b. Which option do you prefer for the future of Port of Auckland?

The Council doesn't appear to be operating the port as efficiently as it might be done (not surprising really given how inefficient many of our local council operations are run!}

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Invest in the proposed Auckland Future Fund

Makes more sense (any fund developed has to be managed well though - professionally)

4d. Do you have any feedback on any other part of the proposal?

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.	Support
Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.	Support
Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes	Support
Discontinue the Long Term Differential Strategy for business rates	Do not support
Re-introduce recycling charges for schools.	Do not support
Continue the planned roll out of rates funded refuse collection to replace the current pay as you throw service, and consequent rates change.	Do not support
Increase the Waitākere Rural Sewerage Targeted Rate from \$296.75 to \$336.80 (per year) to maintain cost recovery	Support

6b. Do you have any other feedback on the proposals in question 6a, the changes to our Revenue and Financing Policy, or other changes to fees and charges?

I do NOT support rates funded refuse collection for North Shore, Waitakere etc. Find a more efficient way for the user pays system to work (rather than the bin tags) but don't disincentivize waste reduction by hiding the cost of household rubbish collection in rates (rather than up front charges). User pays is much better for those who generate low refuse amounts.

Local board priorities

7b. What do you think of our proposed priorities for your local board area in 2024/2025?

Local board priorities	
Support community resilience	Very Important
Local climate action	Very Important
Restore ecological areas	Fairly Important
Support arts and culture	Fairly Important
Library services	Fairly Important
Support community houses	Very Important
Mana whenua relationship	Fairly Important
Support youth initiatives	Very Important
Waitakere Ranges dark sky project	Fairly Important

Tell us why:

We have a unique area which needs both protection and careful planning of development.

Do you have any other comments?

Ensuring our parks and assets are well looked after would be a good idea! In particular. sports fields are not uniformly cared for - resulting in some that are definitely 'poor cousins' in the care they are receiving (or NOT receiving,) compared to other

Do you have any other feedback?

I the WRLB try to do great work however they are hamstrung at times by Council staff that do not;
pass on relevant information
implement decisions made effectively
involve the Board in areas where their input would be helpful

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Do less (reduce council services/ investment), lower rates increases and less debt

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	Do more
Water: Managing stormwater to minimise flooding and protect waterways.	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

The council should do less, they are inefficient and the worst organisation to do more. Just look at the CRL disaster, you built a tunnel when the city was planned for trams, how insane is that.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

The council needs to focus on its core purpose all the the woke and trendy items should be cut.

2. What do you think of the transport proposal?

Do not support most of the proposal

Again fix the roads and infrastructure

2a. Is there anything you would spend more on?

Road maintenance, clearing drains and fixing the water pipes.

2b. Is there anything you would spend less on?

Anything non-core related and stop spending any more on the CRL.

3. Which options do you support for the North Harbour Stadium?

Keep the stadium precinct as it is

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

Proceed with the proposal

4b. Which option do you prefer for the future of Port of Auckland?

Private funds would be more efficient. Limit the lease to 25 years with a ROR for 10 more years.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

Because it's a better idea

4d. Do you have any feedback on any other part of the proposal?

Do you have any other comments?

Should be scrapped.

Do you have any other feedback?

The council needs to do a lessons learned on the viability of the CRL and how much it will bankrupt the city.

Rates funded refuse penalizes single households (who already pay the most for all standing charges) and discourages people to aim for zero waste. It's a disincentive. Roll out user pays across the region instead.

It's disgraceful that the WRLB gets less funding than any board, because of population-based funding. We are responsible for 27,000ha of uninhabited forest. This needs to change Glen Eden is also long overdue for regeneration. This needs to be a priority

Stop letting go of talent because you can't pay the extra 5K for talent in front line service to keep them. The opportunity cost in training and recruitment is crazy.

Support most of the proposal

There's buses that are frequently "low-use" in my areas because AT's policy around bus departures is crazy. In Glen Eden a 30mins service is guaranteed to pull away from the station just as the train pulls up making it useless.

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

The current railway system is not economic or efficient long term as it disrupts motorised traffic at rail crossings.

There should be more time spent on investigating an overhead magnetic rail system before Auckland City incurs significant costs to even

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

There are a lot of parks & reserves which local volunteers currently do some work which could be significantly increased by diverting some inefficiently used third party contract payments to more efficient & effective local volunteers who would get the work done more efficiently & effectively.

Stop putting in speed bumps which everyone is sick of driving over which has decreased productivity & efficiency of private, commercial, public transport & emergency services.

Take out speed bumps when they need maintenance to increase productivity & efficiency of private, commercial, public transport & emergency services.

Terminate the employment of all the people who decided to put in speed bumps so that this inefficient inefficient culture is eliminated from Auckland City Council.

2. What do you think of the transport proposal?

Support most of the proposal

The current Rail system needs a significant review of current technologies to determine the best long term solutions.

Allow private local transport like minivans instead of the exorbitantly expensive AT buses which run mainly empty except at rush hours. Private minivans like in other third and second world countries.

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

4b. Which option do you prefer for the future of Port of Auckland?

As owner operator the port is more likely to be kept at a reasonable standard. A Lessee with a 35 year time horizon has no incentive to maintain or improve the port.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

The "Future fund" is a figment. All we hear about is debt and borrowing, so, are we stripping assets to clear debt? Are we borrowing to stack an investment fund? Own the port. Manage it.

4d. Do you have any feedback on any other part of the proposal?

The Airport is diversified infrastructure and property portfolio. Please do not lose control of the port and the airport. These are vital strategic gateways.

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?
Less bureaucracy. Less overheads. Less middle management.

2. What do you think of the transport proposal?

Support all of the proposal

A growing city cant function without public transport. I generally dont support borrowing but it may be necessary to develop a proper train system. The current situation is not proper - you never know if your service will be operating day to day.

2a. Is there anything you would spend more on?

Getting a rail service that just works. It needs to be faster. It needs to not go on holiday. It needs to operate on weekends. And it shouldn't need armies of staff.

2b. Is there anything you would spend less on?

Waste. For instance, for many months I used to walk past a team of six traffic controllers who, at times, even had an automated pedestrian barrier (six staff not enough?) who were supervising 20 metres of road that had an occasional truck on it bringing s

4b. Which option do you prefer for the future of Port of Auckland?

The money should be used for infrastructure to move the port operations to Whāngarei. Rail tunnel that is big enough for containers for example.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Other

Core Council services should be paid through rates.

Moving the port helps to future proof Auckland IF infrastructure is put in place. Transporting goods BY TRAIN into Auckland from both Whāngarei, Tauranga and Manukau

4d. Do you have any feedback on any other part of the proposal?

Get freight off our roads.

Reduce the weight trucks carry and make them pay their share for road maintenance.

Enable rail transport to Tauranga Whangarei North Shore, ports and Airports

1a. Which option do you prefer for the overall direction for council's Long-term Plan?

Proceed with the central proposal

1b. What would you like Auckland Council to do more or less of?

Transport: Roads, public transport and safety improvements across the transport network	Do more
Water: Managing stormwater to minimise flooding and protect waterways.	Do more
City and local development: Deliver urban regeneration and lead development of the city centre	As proposed
Environment and regulation: Protecting and restoring our natural environment	As proposed
Parks and Community: A wide range of arts, sports, recreation, library and community services including a fair level of funding for local boards	As proposed
Economic and cultural development: Major events funding and economic development	Do less
Council support: Supporting the delivery of services, enabling effective governance, emergency management and grants to regional amenities	Do more

1c. Is there anything else you would like Auckland Council to do more of that you would be prepared to pay more for?

The current dedicated cycleways that are separated from the traffic that we have in Auckland are amazing, create more of these

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

Painting a line on a road designating a cycleway which then ends suddenly is a waste of money, stop doing this.

2. What do you think of the transport proposal?

Support most of the proposal

Dont ditch the cyclways that were designed to be separated from traffic.

2a. Is there anything you would spend more on?

How about rapid buses that go from one interchange directly to another
eg New Lynn direct to Otahuhu

I live in West Auckland, getting to South Auckland to work via Public transport take 90 minutes to 2 hours, A car is faster even in peak hour traffic. The

2b. Is there anything you would spend less on?

Can you stop relying on contractors and set up a council that actually knows how to fix stuff. It will be cheaper in the long run. Outsourcing essential services is wasteful, you must know you are being charged 10 times what it actually cost to do a job,

3. Which options do you support for the North Harbour Stadium?

Consider redeveloping the stadium precinct

Major Investments

4a. What is your preference on the proposal to establish an Auckland Future Fund and transfer Auckland Council's shareholding in Auckland International Airport Limited (AIAL) into this fund (enabling the shares to be sold)?

I don't know

4b. Which option do you prefer for the future of Port of Auckland?

Stupid idea don't contract the business out, it will cost even more in the long run. A private company will keep increasing the cost of using the Port which will hurt everyone.

4c. If the council group continues to operate the Port of Auckland how would you prefer the profits and dividends to be used?

Continue to use it to fund council services

4d. Do you have any feedback on any other part of the proposal?

6a. What do you think of these proposals?

Resume the Natural Environment Targeted Rate (NETR) and extend it to 2034/2035 so we can continue to invest in the protection of native ecosystems and species.	Support
--	---------

Resume the Water Quality Targeted Rate (WQTR) and extend it to 2034/2035 at a level to only cover the annual programme operating and interest costs.	Support
---	---------

Broaden the description of bus services funded by the Climate Action Transport Targeted Rate (CATTR) to reduce the need to consult each year for minor changes	Support
---	---------

Discontinue the Long Term Differential Strategy for business rates	Support
---	---------

Re-introduce recycling charges for schools.	I don't know

2. What do you think of the transport proposal?

Support most of the proposal

I support the principles of the plan but not all proposed implementations. Specifically:

- a 'time-of-use' pricing scheme to help manage traffic congestion - I'm concerned about whether we have agreement on what "viable alternatives" constitute for this o

I wish to ensure no services to the community are cut

1d. Is there anything else you would like Auckland Council to do less of so that you could pay less?

2. What do you think of the transport proposal?

Support most of the proposal

Don't agree with reducing cycleways as this is potentially an effective way to reduce our carbon emissions.

2a. Is there anything you would spend more on?

Cycleways and resources for pedestrians including raised crossings

2b. Is there anything you would spend less on?

Don't proceed with establishing an Auckland Future Fund and transferring AIAL shareholding

4b. Which option do you prefer for the future of Port of Auckland?

35 years is a long time for an asset to be out of council control, especially as the money will be at the beginning of the lease. How can we ensure optimal maintenance of the asset occurs and that workers safety and conditions are protected.
