1111-11	Ian W Gunn	Water	Wastewater	H4.15 Onsite wastewater rules	Correct control 2.1.2.3 by deleting the reference to 1972 and replacing it with 2010.			
1111-12	Ian W Gunn	Water	Wastewater	H4.15 Onsite wastewater rules	Delete control 2.1.2.4.b as manufacturer's should not be forced to include an outlet filter as how the treatment process is configured is irrelevant as long as the treated outflow meets secondary treatment requirements.			
1111-13	Ian W Gunn	Water	Wastewater	H4.15 Onsite wastewater rules	Amend control 2.1.2.4.c to refer to the design criteria instead of the secondary treatment system as follows: c. the secondary (or better) treatment system <del>or better</del> design criteria and parameter ranges provided in Chapter 7 of TP58.			
1111-14	Ian W Gunn	Water	Wastewater	H4.15 Onsite wastewater rules	Clarify control 2.1.2.4.d so that the areal loading rate is the maximum level regardless of soil type as follows: d. the land disposal system must comprise pressure compensating dripper irrigation with an areal loading rate of up to <del>not greater than</del> 5mm/day depending on soil type.			
1111-15	Ian W Gunn	Water	Wastewater	H4.15 Onsite wastewater rules	Recognises that control 2.2.2 is restrictive in design choices of irrigation systems as it permits only pressure compensating dripper irrigation systems (for secondary treated effluent), and the default is a resource consent application for more cost effective and environmentally suitable treatment and land application systems.			
1111-16	Ian W Gunn	Water	Wastewater	H4.15 Onsite wastewater rules	Clarify control 2.1.4's reference to 'without permanent power supply' as few remote access locations will apply unachievable secondary treatment and drip irrigation systems.

1111-19	Ian W Gunn	Water	Wastewater	H4.15 Onsite wastewater rules	Amend control 2.1.4.c by deleting the reference to aerobic treatment systems as it is redundant as this rule addresses sites without permanent power supply as follows: c. septic tanks must be fitted with an outlet filter, <del>unless the equivalent level of treatment is provided within an aerobic treatment system</del> .			
1111-20	Ian W Gunn	Water	Wastewater	H4.15 Onsite wastewater rules	Amend control 2.1.4.4.d by deleting the reference to pressure compensating dripper irrigation system as it is not achievable on sites without permanent power, and add reference to control 2.1.4.4.a to enable a site assessment process to determine the system selection as follows: d. the land disposal system <del>must should</del> comprise pressure compensating dripper irrigation or low pressure effluent distribution systems (LPED) or trenches or beds <u>a gravity loaded or siphon dosed land application system appropriate to the site and soil conditions as determined by 2.1.4.4.a.</u>			
1111-21	Ian W Gunn	Water	Wastewater	H4.15 Onsite wastewater rules	Delete control 2.1.4.4.e as the discharge quality standard is driven by site assessment practices in control 2.1.4.4.a not TP 58.			
1111-22	Ian W Gunn	Water	Wastewater	H4.15 Onsite wastewater rules	Amend 2.1.5 by deleting the word 'feasibly' and replacing it with 'reasonably' as it is appropriate to the level of discretion being sought.			
1111-23	Ian W Gunn	Water	Wastewater	H4.15 Onsite wastewater rules	Correct control 2.1.5.2 to refer to ratio by deleting the word 'proportion' and replace it with 'ratio'.			
1111-24	Ian W Gunn	Water	Wastewater	H4.15 Onsite wastewater rules	Amend control 2.1.5.5.c by deleting the reference to aerobic treatment systems as it is redundant as this rule addresses sites without permanent power supply as follows: c. septic <del>tank tanks</del> must be fitted with an outlet filter, <del>unless the equivalent level of treatment is provided within an aerobic treatment system</del> .			
1111-25	Ian W Gunn	Water	Wastewater	H4.15 Onsite wastewater rules	Amend control 2.1.5.5.d by deleting the reference to the listed systems and replace with reference to a site assessment process to determine the system selection as follows: d. the land disposal <del>system must</del> <u>system should</u> comprise pressure compensating dripper irrigation or low pressure effluent distribution systems (LPED) or trenches or beds <u>a land application method appropriate to the site and soil conditions as determined via (a) above.</u>			
1111-26	Ian W Gunn	Water	Wastewater	H4.15 Onsite wastewater rules	Delete control 2.1.5.5.e as the discharge quality standard is driven by the system selection process which is undertaken via control 2.1.5.5.a.
